Brand Leaders Income Fund

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest”) is a Canadian Investment Manager focused on unique income generating investment products. Harvest was founded in 2009 and is focused on developing investment products that follow three investment criteria:

1. Clear investment objectives
2. Transparency
3. Income generation

Harvest endeavours to develop investment products that are clear in their mandate and easy for our investors to understand. We strive to be transparent, so that our investors can open their financial reports and know exactly what they own. Our funds are also invested to provide investors with consistent monthly or quarterly income; therefore, we seek to invest our fund portfolios in well managed companies that have a history of steady cash flow and pay dividends.

INVESTMENT PRODUCT

The Brand Leaders Income Fund (the “Fund”) invests in an equally-weighted portfolio of fifteen of the world’s top one hundred rated brand companies, each with a market capitalization of at least US\$10 billion. As the US and global economy generally expands, Harvest believes that a diversified portfolio invested in these blue chip companies will provide investors with an attractive yield and strong capital appreciation potential.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been created to provide investors with exposure to a portfolio ("Portfolio") of Equity Securities of issuers selected from the world's top 100 rated brand companies, as recognized by Interbrand in its annual study of the best global brands (the "**Brand Leaders**"), from the Brand Leaders Investable Universe. "**Brand Leaders Investable Universe**" means those Brand Leaders that are eligible to have options written on their Equity Securities and where such Equity securities and options are traded on a North American stock exchange.

The Fund's investment objectives are to provide Unitholders with:

- (i) monthly cash distributions;
- (ii) the opportunity for capital appreciation; and
- (iii) lower overall volatility of Portfolio returns than would otherwise be experienced by owning Equity securities of the Brand Leaders directly.

The Fund's manager, Harvest Portfolios Group Inc. ("Harvest") has retained Highstreet Asset Management Inc. ("Highstreet" or "Investment Manager") to provide investment management services to the Fund.

To achieve its investment objectives, the Fund invests in an equally-weighted portfolio of equity securities of 15 Brand Leaders from the Brand Leaders Investable Universe that have a market capitalization of at least US\$10 billion at the time of investment and meet the investment characteristics described below. In order to seek to generate additional returns, Highstreet will sell "at-the-money" call options each month on Equity Securities held in the Portfolio. The Investment Manager will not sell call options on more than 25% of the Equity Securities of each Brand Leader held in the Fund.

Highstreet will annually rebalance the Portfolio such that, at the time of the initial investment and immediately following each annual rebalancing, the Portfolio will have the following investment characteristics:

- Growth** – An average 5-year Annual Compound Earnings per Share growth rate greater than the average for the Brand Leaders Investable Universe;
- Value** – An average Price-to-Earnings ratio lower than the average for the Brand Leaders Investable Universe;
- Quality** – An average 5-year Return On Equity growth greater than the average for the Brand Leaders Investable Universe; and
- Yield** – An average Yield greater than the average for the Brand Leaders Investable Universe.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

Brand Leaders Income Fund

RESULTS OF OPERATIONS

The Brand Leaders Income Fund returned -2.28% compared to the S&P 100 Index in US dollars return of 0.77% and the S&P 100 Index in Canadian dollars return of 8.34% for the six months ending June 30, 2015.

Equity market volatility picked up during the second quarter of 2015 as uncertainty surrounding Greek bailout negotiations sent European equities lower and rippled through equity markets around the world. This coupled with uncertainty and the anticipation of changes in monetary policy in the United States with the prospects of a rate increase on the horizon also weighed on investor sentiment and exacerbated the volatility. The Fund sold call options on underlying holdings held in the Portfolio during the year in order to meet its investment and income objectives. The Fund was invested in 15 Brand Leaders during the period.

RECENT DEVELOPMENTS

There were no new recent developments during the period.

The Fund also pays service fees to registered dealers at the rate on 0.40% of the average weekly NAV, plus applicable taxes, per annum of the Fund. Service fees are accrued daily and paid monthly to the Manager, who in turn pays the dealers.

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Net assets, at the commencement of operations on July 19, 2011 was \$11.17, net of agents' commissions and issuance costs of \$0.83 per unit.
- Distributions were paid in cash.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The MER for the year December 31, 2014 includes agents' fees and issue costs of \$210,849 related to the warrants issued. The MER for 2011 (the year of inception) included agents' fee and issue costs of \$2,167,988. In both cases these costs are treated as one-time expenses and therefore were not annualized. The MER without these costs is 2.57% for 2014 and 2.93% for 2011.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the year.

Brand Leaders Income Fund

6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
7. Amounts reported for 2015 to 2013 periods are reported in accordance with International Financial Reporting Standards. All other prior periods are reported under Canadian generally accepted accounting principles.

Past Performance

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.
