Brand Leaders Plus Income Fund

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest”) is a Canadian Investment Manager focused on unique income generating investment products. Harvest was founded in 2009 and is focused on developing investment products that follow three investment criteria:

1. Clear investment objectives
2. Transparency
3. Income generation

Harvest endeavours to develop investment products that are clear in their mandate and easy for our investors to understand. We strive to be transparent, so that our investors can open their financial reports and know exactly what they own. Our funds are also invested to provide investors with consistent monthly or quarterly income; therefore, we seek to invest our fund portfolios in well managed companies that have a history of steady cash flow and pay dividends.

INVESTMENT PRODUCT

The Brand Leaders Plus Income Fund (the “Fund”) invests in an equally-weighted underlying portfolio of twenty of the world’s top one hundred rated brand companies, each with a market capitalization of at least US\$10 billion. As the US and global economy generally expands, Harvest believes that a diversified portfolio invested in blue chip companies will provide investors with an attractive yield and strong capital appreciation potential.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund's investment objectives are to provide Unitholders with:

- (i) monthly cash distributions;
- (ii) the opportunity for capital appreciation; and
- (iii) lower overall volatility of Portfolio returns than would otherwise be experienced by owning Equity Securities of the Brand Leaders directly.

The Fund's manager, Harvest Portfolios Group Inc. ("Harvest") has retained Highstreet Asset Management Inc. ("Highstreet" or "Investment Manager") to provide investment management services to the Fund.

To achieve its investment objectives, the Fund will invest in an equally-weighted portfolio of Equity Securities of 20 Brand Leaders from the Brand Leaders Investable Universe that have a market capitalization of at least US\$10 billion at the time of investment and meet the investment characteristics described below. In order to seek to generate additional returns, Highstreet will sell call options on no more than 33% of the Equity Securities of each Brand Leader held in the Fund.

Highstreet will quarterly reconstitute and rebalance the Portfolio such that, at the time of the initial investment and immediately following each quarterly reconstitution and rebalancing, the Portfolio will have the following investment characteristics:

- Value** – An average Price-to-Earnings ratio lower than the average for the Brand Leaders Investable Universe;
- Yield** – An average Yield greater than the average for the Brand Leaders Investable Universe; and
- Quality** – An average 5-year Return on Equity growth greater than the average for the Brand Leaders Investable Universe.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Brand Leaders Plus Income Fund commenced operations July 24, 2014 following the closing of its initial public offering of 4,467,950 Series A units at \$10.00 per unit for gross proceeds of \$44,679,500 and 332,050 Series U units at \$10.00 USD per unit for gross proceeds of \$3,320,500 USD. Performance information is not available for periods less than one year. The opening Series A NAV on July 24, 2014 was \$9.33 and Series U was \$9.33 USD and the Fund has accounted for \$0.60 in distributions since the inception of the Fund.

Equity market volatility picked up during the second quarter of 2015 as uncertainty surrounding Greek bailout negotiations sent European equities lower and rippled through equity markets around the world. This coupled and the anticipation of changes in monetary policy in the United States also weighed on investor sentiment and exacerbated the volatility.

The Fund was invested in 20 Brand Leaders during the period and sold call options on the underlying holdings during the period in order to meet its investment and income objectives.

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Net assets, at the commencement of operations on July 24, 2014 was \$9.33, net of agents' commissions and issuance costs of \$0.67 per unit for Series A and was \$10.02 (\$9.33 USD), net of agents' commissions and issuance costs of \$0.73 (\$0.67 USD) per unit for Series U.
- Distributions were paid in cash.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The MER for 2014 (the year of inception) the year of inception, included agents' fees of \$2,458,549 and issue costs of \$702,443 for Series A and agents' fees of \$187,340 and issue costs of \$53,526 for Series U, which were treated as a one-time expenses and therefore were not annualized. The MER without these costs is 1.85% for both Series A and Series U.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
