INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been established to provide investors with exposure to an actively managed portfolio comprised primarily of Equity Securities of Global Telecom Issuers and Global Utilities Issuers.

The yields on many Global Telecom Issuers continue to remain attractive when compared to other equity, bond and fixed income securities. Over the longer term, the Investment Manager, Avenue Investment Management Inc. ("Avenue" or "Investment Manager"), believes that Global Telecom Issuers will benefit from the mass acceptance of mobile and broadband communications which will be reflected through increasing distributions and capital appreciation of the individual securities.

The yields on Global Utilities Issuers remain at attractive levels due to the stability of earnings and the long track records of consistent dividends that these issuers provide. Avenue believes that the Global Utilities Issuers in developing markets will continue to benefit and expand with the growth of these economies, while the Global Utilities Issuers in developed economies often have natural monopolies or operate in monopolistic-like markets that give them the ability to maintain pricing levels throughout the economic cycle. Avenue also believes that Global Utilities Issuers offer reduced exposure to inflation due to their ability to pass through higher costs to the end consumer.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund continued to perform strongly for the first six months of 2015, returning 5.14% consistent with the custom benchmark index comprised of 50% weighting of the MSCI World Utilities Sector Total Return Index in Canadian currency and a 50% weighting of the MSCI World Telecom Service Sector Total Return Index in Canadian currency return of 5.97% over the same period.

Economic data in the United States continued to show signs of strength during the period. In the broader Eurozone, concerns over the bailout of Greece over-shadowed economic data and resulted in equities becoming more volatile in the second quarter. There continued to be M&A during the period within the Telecommunications & Utilities sectors globally that benefited the Fund.

The Fund continued to focus primarily on the Global Telecommunications and Utilities sub-sectors and has also held select positions in several European and US large-cap positions that offer attractive valuations, dividends and exposure towards global growth that are outside of the core Utilities and Telecommunication sub-sectors.

RECENT DEVELOPMENTS

There have been no new recent developments during the period.

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Distributions were automatically reinvested and the units consolidated.
3. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs), but including leverage costs, of the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The MER for the 2015 period, without the interest expenses of \$27,140 is 1.59%.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
5. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
6. Amounts reported for 2015 to 2013 periods are reported in accordance with International Financial Reporting Standards. All other prior periods are reported under Canadian generally accepted accounting principles.
