## CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest”) is a Canadian Investment Manager focused on unique income generating investment products. Harvest was founded in 2009 and is focused on developing investment products that follow three investment criteria:

1. Clear investment objectives
2. Transparency
3. Income generation

Harvest endeavours to develop investment products that are clear in their mandate and easy for our investors to understand. We strive to be transparent, so that our investors can open their annual report and know exactly what they own. Our funds are also invested to provide investors with consistent monthly or quarterly income; therefore, we seek to invest our fund portfolios in well managed companies that have a history of steady cash flow and pay dividends.

## INVESTMENT PRODUCT

The Global Advantaged Telecom and Utilities Income Fund (the “Fund”) is to provide investors with exposure to an actively managed portfolio comprised primarily of Equity Securities of Global Telecom Issuers and Global Utilities Issuers through a Forward Agreement to the GTU Portfolio Trust (the “GTU Trust”).

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## INVESTMENT OBJECTIVES AND STRATEGY

The Fund's investment objectives are to provide unitholders with:

- (i) tax-advantaged monthly distributions; and
- (ii) capital appreciation.

The Fund has been established to provide investors with exposure to an actively managed portfolio comprised primarily of Equity Securities of Global Telecom Issuers and Global Utilities Issuers through a Forward Agreement to the portfolio of the GTU Trust.

The Fund's manager, Harvest Portfolios Group Inc. ("Harvest"), has retained Avenue Investment Management Inc. ("Avenue") to provide investment management services to the Fund.

The yields on many Global Telecom Issuers continue to remain attractive when compared to other equity, bond and fixed income securities. Over the longer term, Avenue believes that Global Telecom Issuers will benefit from the mass acceptance of mobile and broadband communications which will be reflected through increasing distributions and capital appreciation of the individual securities.

The yields on Global Utilities Issuers remain at attractive levels due to the stability of earnings and the long track records of consistent dividends that these issuers provide. Avenue believes that the Global Utilities Issuers in developing markets will continue to benefit and expand with the growth of these economies, while the Global Utilities Issuers in developed economies often have natural monopolies or operate in monopolistic-like markets that give them the ability to maintain pricing levels throughout the economic cycle. Avenue also believes that Global Utilities Issuers offer reduced exposure to inflation due to their ability to pass through higher costs to the end consumer.

## RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

## RESULTS OF OPERATIONS

The Fund continued to perform strongly for the first six months of 2015, returning 5.14% consistent with the custom benchmark index comprised of 50% weighting of the MSCI World Utilities Sector Total Return Index in Canadian currency and a 50% weighting of the MSCI World Telecom Service Sector Total Return Index in Canadian currency return of 5.97% over the same period.

Economic data in the United States continued to show signs of strength during the period. In the broader Eurozone, concerns over the bailout of Greece over-shadowed economic data and resulted in equities becoming more volatile in the second quarter. There continued to be M&A during the period within the Telecommunications & Utilities sectors globally that benefited the Fund.

The Fund continued to focus primarily on the Global Telecommunications and Utilities sub-sectors and has also held select positions in several European and US large-cap positions that offer attractive valuations, dividends and exposure towards global growth that are outside of the core Utilities and Telecommunication sub-sectors.

### Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Net assets, at the commencement of operations March 23, 2011 was \$11.17, net of agents' commissions and issuance costs of \$0.83 per unit.
- Distributions were paid in cash.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs), of the Fund and the GTU Trust expenses. The MER without GTU Trust expenses is 3.39% and the MER for the Fund for the 2015 period without GTU Trust expenses, the counterparty and the forward fees is 1.69%.
- The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. The TER without GTU Trust expenses is 0.00%.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
