About Harvest Portfolios Group Inc.

Since 2009, Harvest Portfolios Group Inc. (“Harvest”), an independent Canadian investment management company, has been providing Canadian investors access to investment products that generate steady long term income. Harvest managed investment products embrace three investment principles – simplicity, transparency and consistent income to help investors achieve their investment goals.

You will usually pay brokerage fees to your dealer if you purchase or sell units of the Fund on the TSX. If units are purchased or sold on the TSX, investors may pay more than the current net asset value when buying units of the Fund and may receive less than the current net asset value when selling them. There are ongoing fees and expenses associated with owning units of an investment fund. An investment fund must prepare disclosure documents that contain key information about the fund. You can find more detailed information about the fund in these documents. Investment funds are not guaranteed, their values change frequently and past performance may not be repeated. Distributions are paid to you in cash. If the Fund earns less than the amount distributed, the difference is a return of capital.
