

Blockchain Technologies ETF

Interim Management Report of Fund Performance

June 30, 2026

Blockchain Technologies ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own, and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Blockchain Technologies ETF (the "Fund"). You can obtain a copy of the interim financial statements upon request, and at no cost, by calling toll-free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Harvest Blockchain Technologies Index (the "Index"). The Fund invests in equity securities of issuers exposed, directly or indirectly, to the development and implementation of blockchain and distributed ledger technologies.

To achieve its investment objective, the Fund will invest directly or indirectly in the constituents of the Harvest Blockchain Technologies Index to replicate the performance of the Index. The Index is made up of two segments of blockchain technology issuers, namely a large capitalization segment and an emerging segment. The large capitalization segment consists of issuers with at least CAD\$10 billion in market capitalization that are part of the technology sector, are listed on a North American stock exchange and have indirect or direct exposure to blockchain or distributed ledger technologies. The emerging segment contains issuers that are exposed to the development of blockchain and have at least CAD\$50 million in market capitalization, are traded on a North American stock exchange (excluding Over-the-Counter) and satisfy the criteria of a multi-factor ranking model.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the six-month period ended June 30, 2026 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the MSCI ACWI Small Information Technology Net Return USD Index (USD)[±] and Harvest Blockchain Technologies Index for the Period is as follows:

	Return %
Class A	24.23
MSCI ACWI Small Information Technology Net Return USD Index (USD) [±]	66.35
Harvest Blockchain Technologies Index	25.48

The Fund tracks the index which consists of two components: The dedicated blockchain segment and the large-cap segment. The design of the index is such that over time and as the industry matures, a growing proportion of the Fund's allocations will be towards the dedicated blockchain companies. The exact trigger points for the progression are detailed in the index methodology.

The Fund has remained in Stage 3 throughout the period - 75% allocated to the dedicated blockchain segment. The dedicated blockchain segment currently consists of 34 companies. The large-cap segment is fixed at 10 companies until it moves to zero when the Index has over 50 investible companies in the dedicated segment.

Factors Affecting Fund Results

The digital asset equity ecosystem experienced pronounced structural volatility and mid-period asset corrections, driven by broad high-beta deleveraging events and a more hawkish macroeconomic outlook following the Federal Reserve leadership nomination. As Bitcoin consolidated below key technical support levels, the operational execution of individual corporate holdings became the primary driver of performance differentiation. Shares of Intel Corporation surged during the Period as signs an operational turnaround emerged and the company began to demonstrate demand for its semiconductor foundry operations.

Galaxy Digital Inc. also recorded notable gains, following successful infrastructure expansions at its Helios facility and the rollout of institutional tokenized products. TeraWulf Inc. also rallied due to superior cash flow margins generated at its Lake Mariner facility. Conversely, Robinhood Markets, Inc. detracted from performance after a sharp decline in crypto trading revenues weighed heavily on investor sentiment early in the Period. Shares rallied from the lows in the latter half of the Period as improved trading activity results and restructuring actions acted as tailwinds. Circle Internet Group, Inc. also fell during the Period as regulatory headlines impacting the stablecoin industry and indications of a new stablecoin offering from a consortium of large financial services companies including Visa Inc. and Mastercard Incorporated led to volatility for the stock.

Blockchain Technologies ETF

RECENT DEVELOPMENTS

Potential Impact for the Fund

Looking ahead, blockchain technologies and the broader crypto market is expected to remain volatile. Macroeconomic sentiment remains muddled amidst ongoing trade, and foreign policy uncertainties, as well as ongoing conflicts in the Middle East, and Eastern Europe. Uncertainty regarding the adoption of Bitcoin as a reserve asset continues to pressure prices. Nevertheless, the long-term drivers such as tangible steps towards tokenization of Real-World Assets ("RWAs") and deepening institutional adoption of blockchain technology continue to support the sector's long-term growth trajectory.

Mid-Year Market Review

The first half of 2026 was characterized by heightened macroeconomic volatility, driven by a temporary but severe geopolitical disruption in the energy sector and shifting equity market concentration. Global equity markets demonstrated notable resilience amidst rising inflation and unemployment pressures in the first quarter. This transitioned into a broader market expansion during the second quarter as commodity pressures eased, and market leadership diversified.

These macroeconomic and geopolitical conditions were reflected across major indices, with the small-cap Russell 2000 leading equity performance with significant gains, making it a record first-half performance. The Nasdaq Composite advanced on the back of semiconductor hardware manufacturing, which offset weakness in mega-cap software names. Broad-market participation was further emphasized by equal-weighted indexes outperforming their market-cap-weighted counterparts, which faced headwinds from corrections among their largest technology constituents.

The Canadian equity market posted positive returns, supported heavily by an acceleration in financial stocks during the second quarter. In commodity markets, following the outbreak of the conflict in the Middle East, crude oil ultimately ended the first half of the year higher despite a sharp retreat in June. After making new highs to start the year, gold ultimately trended lower through most of the first half as investors contemplated the potential for interest rate hikes by central banks in response to new inflationary pressures related to higher energy prices.

The primary catalyst for early-half volatility stemmed from escalating tensions in the Middle East, which led to open conflict between the U.S. and Iran. The impacts of the war resulted in a sudden supply-side shock to global energy markets. Crude oil prices spiked into triple digits, amplifying global inflation expectations and compressing equity market multiples. Following a ceasefire agreement, supply concerns systematically receded. By June, the stabilization of critical shipping corridors led to a substantial decline in crude from its quarterly peak, mitigating inflationary pressures for the broader economy but acting as a direct headwind for energy sector equities late in the Period.

Simultaneously, a distinct structural divergence emerged within the technology and digital infrastructure sectors regarding artificial intelligence expenditures. Early in the year, investor concern intensified over the intermediate return on investment for large-scale enterprise AI infrastructure, leading to capital outflows and notable stock corrections for prominent hyperscalers. Conversely, demand for physical infrastructure and semiconductor components accelerated. Aggregate capital expenditure forecasts for primary hyperscalers were upwardly revised significantly for the full year. This aggressive capital deployment drove substantial outperformance in hardware suppliers, highlighted by historic gains for the semiconductor sector in the second quarter, which provided the primary tailwind for market-cap-weighted equity benchmarks.

The end of the half marked a broader transition in equity market leadership away from high concentration in mega-cap technology names. While cap-weighted benchmarks underwent modest consolidations, underlying market breadth expanded significantly. Capital rotated into cyclical, value, and economically sensitive sectors, led by Industrials alongside notable defensive advances in Financials and Health Care. Retail and institutional flows increasingly favored equal-weighted strategies and small-cap benchmarks, which more accurately captured the stabilizing trends of the broader underlying economy.

Fixed income markets faced consistent pressure through the first half of the year as long-term treasury yields repeatedly tested elevated thresholds due to persistent headline inflation. The monetary policy framework underwent a fundamental transition under the leadership of Federal Reserve Chair Kevin Warsh. While the committee maintained its benchmark interest rate, it discontinued the practice of providing formal forward guidance.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period. A summary of related party transactions can be found in the Annual IRC Report to Securityholders, available on our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's interim financial statements and past annual audited financial statements.

THE FUND'S NET ASSETS PER UNIT	2026	2025	2024	2023	2022	2021
Net assets - beginning of the period	\$ 21.32	\$ 18.69	\$ 15.30	\$ 8.47	\$ 22.47	\$ 15.85
Increase (decrease) from operations						
Total revenue	0.06	0.10	0.10	0.10	0.05	0.12
Total expenses	(0.12)	(0.21)	(0.17)	(0.11)	(0.14)	(0.25)
Realized gains (losses) for the period	2.73	4.79	1.10	(5.47)	(7.15)	6.04
Unrealized gains (losses) for the period	2.43	(1.14)	1.39	12.01	(7.30)	(5.00)
Total increase (decrease) from operations¹	\$ 5.10	\$ 3.54	\$ 2.42	\$ 6.53	\$ (14.54)	\$ 0.91
Distributions²						
From capital gains	-	-	-	-	-	(3.83)
Total annual distributions²	\$ -	\$ -	\$ -	\$ -	\$ -	\$ (3.83)
Net assets - end of the period¹	\$ 26.49	\$ 21.32	\$ 18.69	\$ 15.30	\$ 8.47	\$ 22.47

RATIOS AND SUPPLEMENTAL DATA	2026	2025	2024	2023	2022	2021
Total net asset value (000's)	\$ 23,578	\$ 20,259	\$ 30,471	\$ 26,316	\$ 17,612	\$ 57,290
Number of units outstanding (000's)	890	950	1,630	1,720	2,080	2,550
Management expense ratio ³	0.98%	0.98%	0.98%	0.98%	0.98%	0.98%
Management expense ratio before waivers or absorptions ³	1.41%	1.45%	1.40%	1.48%	1.41%	1.09%
Trading expense ratio ⁴	0.20%	0.21%	0.29%	0.32%	0.25%	0.32%
Portfolio turnover rate ⁵	38.43%	73.39%	84.79%	54.18%	64.34%	140.80%
Net asset value per unit	\$ 26.49	\$ 21.32	\$ 18.69	\$ 15.30	\$ 8.47	\$ 22.47
Closing Market Price (HBLK)	\$ 26.53	\$ 21.25	\$ 18.69	\$ 15.27	\$ 8.42	\$ 22.50

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans. Included in the above amounts is the reinvested distribution of \$3.83 per unit paid to unitholders of record on December 31, 2021.
3. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
5. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Blockchain Technologies ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following chart presents the Fund's performance for each of the years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except for 2026 which represents the Period.

Class A

Blockchain Technologies ETF

SUMMARY OF INVESTMENT PORTFOLIO

The major portfolio categories and top holdings of the Fund at the end of the Period are indicated in the following tables. A detailed breakdown of the Fund's holdings is available in the "Schedule of Investments" section of the Fund's interim financial statements.

As at June 30, 2026

Top 25 Holdings	% of Net Asset Value
Robinhood Markets, Inc., Class A	10.2
Block, Inc.	8.5
IREN Limited	6.0
Coinbase Global, Inc., Class A	5.9
TeraWulf Inc.	5.7
Cipher Digital Inc.	5.7
Hut 8 Corp.	5.1
Circle Internet Group, Inc.	4.1
Riot Platforms, Inc.	4.0
Core Scientific, Inc.	3.7
Figure Technology Solutions, Inc., Class A	3.1
Intel Corporation	3.0
Wipro Limited ADR	2.9
International Business Machines Corporation	2.8
Galaxy Digital Inc., Class A	2.8
Cash and other assets and liabilities	2.7
MARA Holdings, Inc.	2.6
Microsoft Corporation	2.3
SAP SE ADR	2.3
Visa Inc., Class A	2.1
Infosys Limited ADR	2.1
Mastercard Incorporated, Class A	2.0
Oracle Corporation	1.9
Accenture PLC, Class A	1.8
Cleantech, Inc.	1.6
Total	94.9

SECTOR ALLOCATION

Sector	% of Net Asset Value
Information Technology	60.7
Financials	33.4
Consumer Finance	3.1
Cash and other assets and liabilities	2.7
Health Care	0.1
Total	100.0

GEOGRAPHIC ALLOCATION

Country of Risk	% of Net Asset Value
United States	75.1
Canada	8.7
Australia	6.0
India	5.0
Cash and other assets and liabilities	2.7
Germany	2.2
China	0.3
Total	100.0
