

Harvest Tech Leaders Enhanced Income ETF (formerly Harvest Tech Achievers Enhanced Income ETF)

Interim Management Report of Fund Performance

June 30, 2026

Harvest Tech Leaders Enhanced Income ETF

(formerly Harvest Tech Achievers Enhanced Income ETF)

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own, and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Harvest Tech Leaders Enhanced Income ETF (formerly Harvest Tech Achievers Enhanced Income ETF) (the "Fund"). You can obtain a copy of the interim financial statements upon request, and at no cost, by calling toll-free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund utilizes approximately 25% leverage to provide 1.25 times exposure to Harvest Tech Leaders Income ETF (formerly Harvest Tech Achievers Income ETF) ("Underlying ETF" or "HTA") with the investment objective of providing unitholders with high monthly cash flows and an opportunity for capital appreciation.

HTA invests in equity securities of companies that are in the technology sector, which the Manager of the Fund determined to be technology achievers, and sells covered call options on up to 33% of its holdings with an investment objective to generate monthly cash flows for the unitholders and help lower the volatility of the Fund's overall return. In addition, the Fund provides unitholders with the opportunity to participate in capital appreciation.

The Fund is considered an alternative mutual fund within the meaning of NI 81-102 and is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. As an alternative mutual fund, the Fund may use strategies generally prohibited for conventional mutual funds, including investing in other alternative mutual funds; using leverage through the use of cash borrowings, short sales and/or derivatives; and having an increased ability to invest in commodities. While these strategies will be used in accordance with the Fund's investment objectives and strategies, they may, under certain market conditions, accelerate the rate at which an investment decreases in value.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the six-month period ended June 30, 2026 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return compared to the Solactive US Large & Mid Cap Technology Index NTR (USD)^Y for the Period is as follows:

	Return %
Class A	32.46
Solactive US Large & Mid Cap Technology Index NTR (USD) ^Y	12.16

Below is a discussion of the results of operations of HTA during the Period.

The primary reason for the divergence is that the index is market-capitalization weighted, holds positions that do not meet the size / liquidity criteria of HTA, has a larger number of holdings, holds companies that do not have liquid options, and does not use covered calls, compared to HTA that has an active security selection and active covered call option writing processes.

Factors Affecting Fund Results

The Fund invests in units of the Harvest Tech Leaders Income ETF ("HTA") and utilizes a modest amount of leverage, targeting about 25%, to enhance returns and the distribution yield relative to an unlevered investment in HTA.

The technology sector experienced intense structural cross-currents during the Period, with the Fund navigating sharp asset corrections in software that were counterbalanced by significant operational tailwinds across specialized hardware and semiconductor infrastructure components. Software holdings encountered aggressive selling pressure through much of the Period as investors contemplated the potentially disruptive impacts from artificial intelligence solutions to incumbent business models. Companies in the IT services industry were similarly impacted by business model disruption concerns, with shares of Accenture PLC also falling sharply during the Period. Investors also became more sensitive to the continued escalation in capital spending intentions and rising need for financing to support these plans. As the Period progressed, some stocks like Oracle Corporation and Meta Platforms, Inc. came under pressure in response to increased capital expenditure guidance and financing needs.

Harvest Tech Leaders Enhanced Income ETF

(formerly Harvest Tech Achievers Enhanced Income ETF)

Hardware companies remained leading beneficiaries from the high levels of capital spending employed to build out data centre infrastructure. Memory and storage manufacturers, such as Micron Technology, Inc. and Seagate Technology Holdings PLC, led the group higher as strong demand and supply shortages drove significant pricing power for these companies, while semiconductor equipment companies also benefitted from strong results and expectations of further capacity expansion. Meanwhile, former leaders like NVIDIA Corporation and Broadcom Inc. experienced more modest returns.

RECENT DEVELOPMENTS

Potential Impact for the Fund

Investment in infrastructure to support development and implementation of artificial intelligence (“AI”) solutions is expected to continue rising, however investors have become increasingly sensitive to higher financing needs to support this investment and skepticism regarding the ultimate return on investment for these projects continues to surface from time to time, which will likely lead to periods of heightened volatility. That being said, companies within the hardware-focused subsectors are likely to see continued benefits from these higher spending levels over the intermediate term. Conversely, many software companies will likely continue to be subject to ongoing concerns related to the potential for disruption from advances in AI solutions.

On April 22, 2026, the name of the Fund changed from Harvest Tech Achievers Enhanced Income ETF to Harvest Tech Leaders Enhanced Income ETF.

Mid-Year Market Review

The first half of 2026 was characterized by heightened macroeconomic volatility, driven by a temporary but severe geopolitical disruption in the energy sector and shifting equity market concentration. Global equity markets demonstrated notable resilience amidst rising inflation and unemployment pressures in the first quarter. This transitioned into a broader market expansion during the second quarter as commodity pressures eased, and market leadership diversified.

These macroeconomic and geopolitical conditions were reflected across major indices, with the small-cap Russell 2000 leading equity performance with significant gains, making it a record first-half performance. The Nasdaq Composite advanced on the back of semiconductor hardware manufacturing, which offset weakness in mega-cap software names. Broad-market participation was further emphasized by equal-weighted indexes outperforming their market-cap-weighted counterparts, which faced headwinds from corrections among their largest technology constituents.

The Canadian equity market posted positive returns, supported heavily by an acceleration in financial stocks during the second quarter. In commodity markets, following the outbreak of the conflict in the Middle East, crude oil ultimately ended the first half of the year higher despite a sharp retreat in June. After making new highs to start the year, gold ultimately trended lower through most of the first half as investors contemplated the potential for interest rate hikes by central banks in response to new inflationary pressures related to higher energy prices.

The primary catalyst for early-half volatility stemmed from escalating tensions in the Middle East, which led to open conflict between the U.S. and Iran. The impacts of the war resulted in a sudden supply-side shock to global energy markets. Crude oil prices spiked into triple digits, amplifying global inflation expectations and compressing equity market multiples. Following a ceasefire agreement, supply concerns systematically receded. By June, the stabilization of critical shipping corridors led to a substantial decline in crude from its quarterly peak, mitigating inflationary pressures for the broader economy but acting as a direct headwind for energy sector equities late in the Period.

Simultaneously, a distinct structural divergence emerged within the technology and digital infrastructure sectors regarding artificial intelligence expenditures. Early in the year, investor concern intensified over the intermediate return on investment for large-scale enterprise AI infrastructure, leading to capital outflows and notable stock corrections for prominent hyperscalers. Conversely, demand for physical infrastructure and semiconductor components accelerated. Aggregate capital expenditure forecasts for primary hyperscalers were upwardly revised significantly for the full year. This aggressive capital deployment drove substantial outperformance in hardware suppliers, highlighted by historic gains for the semiconductor sector in the second quarter, which provided the primary tailwind for market-cap-weighted equity benchmarks.

The end of the half marked a broader transition in equity market leadership away from high concentration in mega-cap technology names. While cap-weighted benchmarks underwent modest consolidations, underlying market breadth expanded significantly. Capital rotated into cyclical, value, and economically sensitive sectors, led by Industrials alongside notable defensive advances in Financials and Health Care. Retail and institutional flows increasingly favored equal-weighted strategies and small-cap benchmarks, which more accurately captured the stabilizing trends of the broader underlying economy.

Fixed income markets faced consistent pressure through the first half of the year as long-term treasury yields repeatedly tested elevated thresholds due to persistent headline inflation. The monetary policy framework underwent a fundamental transition under the leadership of Federal Reserve Chair Kevin Warsh. While the committee maintained its benchmark interest rate, it discontinued the practice of providing formal forward guidance.

LOAN PAYABLE

The Fund has entered into prime broker agreements with wholly owned subsidiaries of Canadian chartered banks (the “Prime Brokers”) in order to facilitate borrowing for the purpose of investing in accordance with its investment strategy. The Fund may borrow against collateral on deposit with the Prime Brokers with such borrowing being repayable on demand. Interest is payable on any borrowings at a variable rate of interest that is calculated daily and payable monthly. The interest incurred during the Period is presented as interest expense on the Statement of Comprehensive Income (Loss) in the financial statements.

Harvest Tech Leaders Enhanced Income ETF

(formerly Harvest Tech Achievers Enhanced Income ETF)

The table below summarizes the minimum and maximum amount borrowed under the agreement, the interest incurred, and the range of variable rate of interest during the Period:

For the period ended	June 30, 2026
Minimum amount borrowed	\$20,539,762
Maximum amount borrowed	\$27,609,051
Interest expense	\$312,682
Range of variable rate of interest	2.80% - 2.80%

The Fund may borrow up to 33% but intends to borrow approximately 25% of its net asset value at any given time. The amount of borrowing and the percentage of the net asset value of the Fund as at June 30, 2026 are as follows:

As at	June 30, 2026
Amount of borrowing	\$27,029,064
Amount borrowed as % of net assets	23.9%
Market value of investments held as collateral at Prime Broker	\$114,932,692

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period. A summary of related party transactions can be found in the Annual IRC Report to Securityholders, available on our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's interim financial statements and past annual audited financial statements.

THE FUND'S NET ASSETS PER UNIT	2026	2025	2024	2023	2022
Net assets - beginning of the period²	\$ 17.02	\$ 16.87	\$ 14.61	\$ 9.80	\$ 10.00
Increase (decrease) from operations					
Total expenses	(0.08)	(0.16)	(0.21)	(0.17)	(0.02)
Realized gains (losses) for the period	1.26	2.66	2.76	1.01	0.02
Unrealized gains (losses) for the period	4.25	(0.41)	0.86	5.26	(0.52)
Total increase (decrease) from operations¹	\$ 5.43	\$ 2.09	\$ 3.41	\$ 6.10	\$ (0.52)
Distributions³					
From capital gains	(0.23)	(1.43)	(1.40)	-	-
Return of capital	(0.82)	(0.49)	(0.29)	(1.37)	(0.21)
Total annual distributions³	\$ (1.05)	\$ (1.92)	\$ (1.69)	\$ (1.37)	\$ (0.21)
Net assets - end of the period¹	\$ 21.23	\$ 17.02	\$ 16.87	\$ 14.61	\$ 9.80

RATIOS AND SUPPLEMENTAL DATA	2026	2025	2024	2023	2022
Total net asset value (\$000's)	\$ 113,062	\$ 84,235	\$ 101,224	\$ 41,630	\$ 9,063
Number of units outstanding (000's)	5,325	4,950	6,000	2,850	925
Management expense ratio ⁴	2.13%	2.23%	2.47%	2.57%	1.92%
Management expense ratio excluding the cost of financing ⁴	1.42%	1.42%	1.24%	1.23%	1.21%
Management expense ratio before waivers or absorptions ⁴	2.13%	2.23%	2.69%	3.12%	6.60%
Trading expense ratio ⁵	0.08%	0.08%	0.08%	0.13%	0.14%
Portfolio turnover rate ⁶	14.70%	43.13%	26.05%	35.10%	6.00%
Net asset value per unit	\$ 21.23	\$ 17.02	\$ 16.87	\$ 14.61	\$ 9.80
Closing Market Price (HTAE)	\$ 21.21	\$ 17.03	\$ 16.89	\$ 14.58	\$ 9.77

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit. There was a reclass between realized gain (losses) and unrealized gain (losses) for 2024. There was no impact to the Fund and Net assets – end of the period for 2024 or 2025 as a result of the reclass.
2. Net assets, at the commencement of operations on October 20, 2022 was \$10.00.
3. Distributions, if any, are paid in cash or reinvested in additional units of the Fund. The Fund may pay additional year-end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans.
4. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) and the proportionate share of the Underlying ETF's related expenses of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
5. The trading expense ratio represents total commissions and other portfolio transaction costs and the proportionate share of the Underlying ETF's related expenses expressed as an annualized percentage of daily average net asset value during the period.
6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Tech Leaders Enhanced Income ETF

(formerly Harvest Tech Achievers Enhanced Income ETF)

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following chart presents the Fund's performance for each of the years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year except for 2026 which represents the Period.

Class A

Harvest Tech Leaders Enhanced Income ETF

(formerly Harvest Tech Achievers Enhanced Income ETF)

SUMMARY OF INVESTMENT PORTFOLIO

The major portfolio categories and top holdings of the Fund at the end of the Period are indicated in the following tables. A detailed breakdown of the Fund's holdings is available in the "Schedule of Investments" section of the Fund's interim financial statements.

Information presented is for the Underlying ETF in which the Fund primarily invests.

As at June 30, 2026

Top Holdings	% of Net Asset Value
Lam Research Corporation	7.3
Applied Materials, Inc.	7.3
Palo Alto Networks, Inc.	7.0
Advanced Micro Devices, Inc.	6.9
Micron Technology, Inc.	6.5
Cisco Systems, Inc.	5.8
Seagate Technology Holdings PLC	5.6
Amphenol Corporation, Class A	5.0
