

Harvest US Bank Leaders Income ETF

Interim Management Report of Fund Performance

June 30, 2026

Harvest US Bank Leaders Income ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own, and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Harvest US Bank Leaders Income ETF (the "Fund"). You can obtain a copy of the interim financial statements upon request, and at no cost, by calling toll-free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund invests in equity securities of the leading U.S. banks (as determined by the Manager of the Fund) and sells covered call options on up to 33% of its holdings with the investment objective to generate monthly cash flows for the unitholders and help lower the volatility of the Fund's overall return. In addition, the Fund provides unitholders with the opportunity to participate in capital appreciation.

To achieve its investment objective, the Fund will hold between 15 to 20 U.S. bank stocks that are considered to be leaders in the U.S. banking industry as determined by the Manager of the Fund. These U.S. bank leaders have market capitalization of at least US\$10 billion at the time of investment; are listed on a U.S. stock exchange and; pay a dividend. The Fund is rebalanced quarterly. The Fund will invest at least 75% of its net asset value in issuers that are classified as a Banks based on the Global Industry Classification Standards.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the six-month period ended June 30, 2026 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the MSCI US Banks Net Total Return Index (USD)[±] for the Period is as follows:

	Return %
Class A (CAD) – hedged	8.54
Class U (USD) – unhedged	9.45
MSCI US Banks Net Total Return Index (USD) [±]	4.76

The primary reason for the divergence is that the index is market-capitalization weighted, is much more concentrated in money center banks, does not account for the use of covered calls and has relatively small exposure towards U.S. regional banks compared to the Fund that is equally weighted and active covered call option writing processes.

The performance returns between classes of the Fund will vary as a result of the Class A hedging its exposure to the U.S. dollar back to the Canadian dollar and the Class U being unhedged units.

Factors Affecting Fund Results

The U.S. banking sector recorded highly divergent performance paths during the Period, initially advancing on a steepening yield curve and clean underlying loan credit quality. Financial results across large-cap banks were generally supported by resilient net interest margins. Investor sentiment cooled in February as investors began evaluating the risk to the broader financial system from deteriorating conditions in private credit markets while inflationary pressures, in part stemming from a surge in oil prices, caused investors to reevaluate their outlooks for the Federal Reserve's monetary policy path. As signs of deescalation in the Middle East conflict emerged, investors refocused their attention on signs of an improving economy and a more bank-friendly regulatory environment.

Regional banks generally outperformed diversified banks during the Period; however, Truist Financial Corporation and Huntington Bancshares Incorporated underperformed their larger diversified peers. Conversely, mega-cap money center institutions like Citigroup Inc. and JPMorgan Chase & Co. benefitted from strong capital markets results, particularly within trading businesses that profited from elevated market volatility.

The Fund employs a covered call strategy to generate monthly cash flows through the sale of call options.

Harvest US Bank Leaders Income ETF

RECENT DEVELOPMENTS

Potential Impact for the Fund

The U.S. bank sector is likely to benefit from a friendlier regulatory backdrop, particularly if regulatory capital requirements continue to moderate which could lead to improved shareholder capital returns via higher dividend payouts and share buy backs. An improving economic outlook in the U.S. may lead to stronger loan growth over the intermediate term, bolstering financial results, however, persistent inflationary pressures could cause the Federal Reserve to adopt a more restrictive monetary policy stance than currently expected by investors.

Mid-Year Market Review

The first half of 2026 was characterized by heightened macroeconomic volatility, driven by a temporary but severe geopolitical disruption in the energy sector and shifting equity market concentration. Global equity markets demonstrated notable resilience amidst rising inflation and unemployment pressures in the first quarter. This transitioned into a broader market expansion during the second quarter as commodity pressures eased, and market leadership diversified.

These macroeconomic and geopolitical conditions were reflected across major indices, with the small-cap Russell 2000 leading equity performance with significant gains, making it a record first-half performance. The Nasdaq Composite advanced on the back of semiconductor hardware manufacturing, which offset weakness in mega-cap software names. Broad-market participation was further emphasized by equal-weighted indexes outperforming their market-cap-weighted counterparts, which faced headwinds from corrections among their largest technology constituents.

The Canadian equity market posted positive returns, supported heavily by an acceleration in financial stocks during the second quarter. In commodity markets, following the outbreak of the conflict in the Middle East, crude oil ultimately ended the first half of the year higher despite a sharp retreat in June. After making new highs to start the year, gold ultimately trended lower through most of the first half as investors contemplated the potential for interest rate hikes by central banks in response to new inflationary pressures related to higher energy prices.

The primary catalyst for early-half volatility stemmed from escalating tensions in the Middle East, which led to open conflict between the U.S. and Iran. The impacts of the war resulted in a sudden supply-side shock to global energy markets. Crude oil prices spiked into triple digits, amplifying global inflation expectations and compressing equity market multiples. Following a ceasefire agreement, supply concerns systematically receded. By June, the stabilization of critical shipping corridors led to a substantial decline in crude from its quarterly peak, mitigating inflationary pressures for the broader economy but acting as a direct headwind for energy sector equities late in the Period.

Simultaneously, a distinct structural divergence emerged within the technology and digital infrastructure sectors regarding artificial intelligence expenditures. Early in the year, investor concern intensified over the intermediate return on investment for large-scale enterprise AI infrastructure, leading to capital outflows and notable stock corrections for prominent hyperscalers. Conversely, demand for physical infrastructure and semiconductor components accelerated. Aggregate capital expenditure forecasts for primary hyperscalers were upwardly revised significantly for the full year. This aggressive capital deployment drove substantial outperformance in hardware suppliers, highlighted by historic gains for the semiconductor sector in the second quarter, which provided the primary tailwind for market-cap-weighted equity benchmarks.

The end of the half marked a broader transition in equity market leadership away from high concentration in mega-cap technology names. While cap-weighted benchmarks underwent modest consolidations, underlying market breadth expanded significantly. Capital rotated into cyclical, value, and economically sensitive sectors, led by Industrials alongside notable defensive advances in Financials and Health Care. Retail and institutional flows increasingly favored equal-weighted strategies and small-cap benchmarks, which more accurately captured the stabilizing trends of the broader underlying economy.

Fixed income markets faced consistent pressure through the first half of the year as long-term treasury yields repeatedly tested elevated thresholds due to persistent headline inflation. The monetary policy framework underwent a fundamental transition under the leadership of Federal Reserve Chair Kevin Warsh. While the committee maintained its benchmark interest rate, it discontinued the practice of providing formal forward guidance.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period. A summary of related party transactions can be found in the Annual IRC Report to Securityholders, available on our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Harvest US Bank Leaders Income ETF

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's interim financial statements and past annual audited financial statements.

Class A

THE FUND'S NET ASSETS PER UNIT	2026	2025	2024	2023	2022	2021

Harvest US Bank Leaders Income ETF

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans. Included in the above amounts is the reinvested distribution of \$0.25 per unit paid to Class A unitholders of record on December 31, 2021.
3. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
5. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest US Bank Leaders Income ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following charts present the Fund's performance for each of the years shown and illustrate how the Fund's performance varied for Class A and Class U. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year, except for 2026 which represents the Period.
