Brand Leaders Income Fund

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest”) is a Canadian Investment Manager focused on unique income generating investment products. Harvest was founded in 2009 by long term members of the investment management industry and is focused on developing investment products that follow the investment philosophy of:

1. Clear investment objectives
2. Transparency
3. Income generation

Harvest’s mandate is to develop investment products that are clear in their mandate and easy for our investors to understand. We strive to be transparent, so that our investors can open their financial reports and know exactly what they own. Our funds are also invested to provide investors with consistent monthly or quarterly income; therefore, we seek to invest our fund portfolios in well managed companies that have a history of steady cash flow and pay dividends or distributions.

INVESTMENT PRODUCT

The Brand Leaders Income Fund (the “Fund”) invests in an equally-weighted underlying portfolio of fifteen of the world’s top one hundred rated brand companies, each with a market capitalization of at least US\$10 billion. As the US and global economy generally expands, Harvest believes that a diversified portfolio invested in the blue chip companies will provide investors with an attractive yield and strong capital appreciation potential.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been created to provide investors with a unique exposure to a portfolio of assets ("Portfolio") of Equity securities of issuers selected from the world's top 100 rated brand companies, as recognized by Interbrand in its annual study of the best global brands (the "**Brand Leaders**"), from the Brand Leaders Investable Universe. "**Brand Leaders Investable Universe**" means those Brand Leaders that are eligible to have options written on their Equity securities and where such Equity securities and options are traded on a North American stock exchange.

The Fund's investment objectives are to provide Unitholders with:

- (i) monthly cash distributions;
- (ii) the opportunity for capital appreciation; and
- (iii) lower overall volatility of Portfolio returns than would otherwise be experienced by owning Equity securities of the Brand Leaders directly.

The Fund's manager, Harvest Portfolios Group Inc. ("Harvest") has retained Highstreet Asset Management Inc. ("Highstreet" or "Investment Manager") to provide investment management services to the Fund.

To achieve its investment objectives, the Fund will invest in an equally-weighted portfolio of equity securities of 15 Brand Leaders from the Brand Leaders Investable Universe that have a market capitalization of at least US\$10 billion at the time of investment and meet the investment characteristics described below. In order to seek to generate additional returns, Highstreet will sell "at-the-money" call options each month on equity securities held in the Portfolio. The Investment Manager will not sell call options on more than 25% of the equity securities of each Brand Leader held in the Fund.

INVESTMENT STRATEGY

Highstreet will select the Fund's initial equity securities for the Fund and will annually rebalance the Portfolio such that, at the time of the initial investment and immediately following each annual rebalancing, the Portfolio will have the following investment characteristics:

- Growth** – An average 5-year Annual Compound Earnings per Share growth rate greater than the average for the Brand Leaders Investable Universe;
- Value** – An average Price-to-Earnings ratio lower than the average for the Brand Leaders Investable Universe;
- Quality** – An average 5-year Return On Equity growth greater than the average for the Brand Leaders Investable Universe; and
- Yield** – An average Yield greater than the average for the Brand Leaders Investable Universe.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

Brand Leaders Income Fund

RESULTS OF OPERATIONS

The Fund returned 5.25% the period ending June 30, 2014 versus the S&P 100 Index return in US dollars of 5.88%.

Continued evidence of an improving economic backdrop through the period had a positive impact in the US markets. While economic data is not uniform across individual countries around the world, data in general from other key regions in the world such as Europe, Latin America and Asia have also shown continued improvements and has resulted in synchronized economic growth around the world. With interest rates and bond yields remaining historically low, investors continued to have strong interest in alternatives to fixed income, in particular equities.

The Fund sold call options on underlying holdings held in the Portfolio during the year in order to meet its investment and income objectives. The Fund remained invested in the original 15 Brand Leaders.

RECENT DEVELOPMENTS

Effective January 1, 2014, the Fund prepared its financial statements in compliance with International Financial Reporting Standards (IFRS). The Fund adopted this basis of accounting as required by Canadian securities legislation and the Canadian Accounting Standards Board. Previously, the Fund prepared its financial statements in accordance with Canadian generally accepted accounting principles as defined in the Part V of the CICA Handbook ("Canadian GAAP"). The Fund has consistently applied the accounting policies used in the preparation of its opening IFRS statement of financial position at January 1, 2013 and throughout all periods presented in the financial statements, as if these policies had always been in effect.

The Fund renewed its normal course issuer bid program for the period from August 23, 2013 to August 22, 2014, which allows the Fund to purchase up to 239,804 trust units of the Fund for cancellation by way of a normal course issuer bid through the facilities of the Toronto Stock Exchange. During the year ended June 30, 2014 14,400 (2013 – 2,400) units were purchased for cancellation for \$171,365 (2013 - \$26,670).

On February 5, 2014 the Fund filed a short form prospectus that qualifies the Fund for distribution of warrants. Warrants were issued to unitholders of record on February 18, 2014. A total of 1,917,745 warrants were issued to subscribe for 958,872 units of the fund at a subscription price of \$11.74 per unit. Two whole warrants entitle the holder to purchase one unit on or before 5:00 p.m. (Toronto time) up to August 15, 2014. Warrants not exercised will be void and of no value.

RELATED PARTY TRANSACTIONS

There were no related party transactions during the reporting period, except for management fees and other expense reimbursements paid to Harvest, as noted below in Management and Other Fees.

MANAGEMENT AND OTHER FEES

The Fund pays its manager, Harvest, a management fee calculated based on the average net asset value ("NAV") and paid monthly in arrears, based on an annual rate of 0.90%, plus applicable taxes, of the NAV of the Fund. The Fund also pays service fees to registered dealers at the rate on 0.40 % of the NAV, plus applicable taxes, per annum of the Fund. Service fees are accrued daily and paid monthly to the Manager, who in turn pays the dealers.

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

Explanatory Notes:

1. The Net Assets per unit presented in the financial statements differs from the Net Asset Value calculated for fund pricing purposes. The difference is primarily a result of the value of warrants issued being presented as a separate component in liabilities and revalued based on its fair value through the Statement of Comprehensive Income. An explanation of these differences can be found in the Notes to Financial Statements.
2. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
3. Net assets, at the commencement of operations on July 19, 2011 was \$11.17, net of agents' commissions and issuance costs of \$0.83 per unit.
4. Distributions were paid in cash.
5. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The MER for the period June 30, 2014 includes agents' fees and issue costs of \$144,682 related to the warrants issued. The MER for 2011 (the year of inception) included agents' fees and issue costs of \$2,167,988. In both cases these costs are treated as one-time expenses and therefore were not annualized. The MER without these costs is 2.85% for 2014 and 2.93% for 2011.
6. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
7. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Past Performance

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.
