CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria:

1. Clear investment objectives
2. Transparency
3. Consistent income and growth

Harvest endeavours to develop investment products that are clear in their mandate and easy for our investors to understand. We strive to be transparent, so that our investors can open their reports and know exactly what they own. Our funds are invested to provide investors with consistent monthly or quarterly income; therefore, we seek to invest our fund portfolios in well managed companies that have a history of steady cash flow and pay dividends.

The Blockchain Technologies ETF (the “Fund”) seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Harvest Blockchain Technologies Index. The Fund invests in equity securities of issuers exposed, directly or indirectly, to the development and implementation of blockchain and distributed ledger technologies.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Harvest Blockchain Technologies Index (the "Index"). The Fund invests in equity securities of issuers exposed, directly or indirectly, to the development and implementation of blockchain and distributed ledger technologies.

In order to achieve its investment objective and to obtain direct or indirect exposure to the Constituent Securities¹ of the Index, the Fund may hold the Constituent Securities of the Index in approximately the same proportion as they are reflected in that Index or may hold securities of one or more exchange traded funds that replicate the performance of the applicable Index, or a subset of such Index. The Fund will invest in its own portfolio comprised of various securities and instruments which may include, but are not limited to, equity and equity related securities. Equity related securities held by the Fund may include, but are not limited to, convertible debt, income trust units, single issuer equity options, preferred shares and warrants. If market conditions require, in order to preserve capital, the Fund may seek to invest a substantial portion of its assets in cash and cash equivalents.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund returned 27.81% for the period ended June 30, 2019 versus the Index of 28.35%.

The Fund tracks the Harvest Blockchain Technologies Index consisting of two components: The Emerging Blockchain segment and the Large Cap Blockchain segment. Following the launch of the Fund, the Emerging segment was quite volatile with downward pressure on many of the smaller capitalization companies driven in part by concerns over regulation and potential security threats. Crypto currencies such as Bitcoin were also under significant pressure. While the Fund does not invest directly in crypto currencies, several of the Emerging Blockchain companies were affected by the decline in crypto currencies, particularly the segment often referred to as the crypto miners. Closing near the historical lows at the end of 2018, there has since been renewed interest in blockchain technologies, as broad-based development continued to gain momentum and more news flow surrounding broad-based adoption across industries sparked interest in the Emerging Blockchain segment of the Fund. At the same time the Large Cap Blockchain segment benefited from increased interest in the Information Technology sub-sector as part of the shift in broader market sentiment with the sector being the top performing sub-sector for the first half of 2019. M&A also surfaced in the Emerging Blockchain sub-sector with 2 of the underlying positions being taken over during the period.

The Index continued to be at stage 1 of the growth progression of the Emerging constituents. As the number of companies that meet the criteria for inclusion in the index increase, the weighting of the exposure towards the more dedicated Emerging companies will also progressively increase at predefined levels.

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Net assets, at the commencement of operations on February 2, 2018 was \$10.00.
3. Distributions, if any, are paid in cash.
4. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
5. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
