We strive to be transparent, so that our investors can open their financial reports and know exactly what they own. INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been created to provide investors with a unique exposure to a portfolio of Equity Securities that are primarily included in the Banks sector of the Global Industry Classification Standards¹ and (i) have a market capitalization that is at least US\$10 billion as determined at the time of investment; (ii) are listed on a US stock exchange; and (iii) pay a dividend.

The Fund's investment objectives are to provide unitholders with:

- (i) monthly cash distributions; and
- (ii) the opportunity for capital appreciation.

To achieve its investment objectives, the Fund will invest in an equally weighted portfolio of Equity Securities of not less than 15 US Bank Leaders and not more than 20 US Bank Leaders, chosen from the US Bank Leaders Investable Universe. In order to seek to generate additional returns, the Manager will sell call options on no more than 33% of the Equity Securities of each US Bank Leader held in the Fund. At the time of the initial investment and immediately following each quarter reconstitution, the Manager will review and give consideration to select investment characteristics that may include:

- Value** – Price-to-Earnings Ratio, Price-to-Book Value Ratio, Price-to-Cash Flow Ratio and Yield;
- Quality** – Return-on-Equity, Debt-to-Equity, Debt-to-Cash Flow Ratio and debt maturity profile; and
- Growth** – Long term earnings and dividend per share growth.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund returned 13.11% for Series A and 13.79% for Series U compared to the S&P 500 Banks Total Return in USD of 17.50% for the period ended June 30, 2019.

U.S. banks performed well during the first half of 2019 rebounding from a year of weak performance in 2018. Falling interest rates overall as well as narrower spreads between long-term and short-term interest rates continue to be headwinds for bank earnings. However, during the first half of 2019 the U.S. Federal Reserve began to strike a more dovish tone, signaling a potential reversal in recent monetary policy and potentially lowering funding costs for banks. Additionally, credit conditions remain stable, loan growth appears to have improved modestly and capital positions at the major U.S. banks continue to be solid as evidenced by recent increases in shareholder capital return by several large U.S. banks.

The Fund was invested into a diversified portfolio of 15 issuers consisting primarily of large capitalization US banks & related financial institutions and wrote call options in accordance with its investment objectives.

RECENT DEVELOPMENTS

State Street Trust Company Canada will replace CIBC Mellon Trust Company as the custodian of the Fund. CIBC Mellon Global Security Services Company, who currently provides accounting services in respect of the Fund will be replaced by State Street Fund Services Toronto Inc. as the valuation agent of the Fund. Both of these changes are expected to take effect on or about September 23, 2019.

There were no other recent developments during the reporting period.

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Net assets, at the commencement of operations on January 31, 2018 was \$20.00 for Class A and \$20.00 USD for Class U.
3. Distributions were paid in cash.
4. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
5. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
7. The USD amount of the net assets at the end of the period was \$15.77 USD.
