## MANAGEMENT REPORT OF FUND PERFORMANCE

---

### Harvest Healthcare Leaders Income ETF

December 31, 2021

The Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure, can be obtained at your request, and at no cost, by calling us at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; by visiting our website at [www.harvestportfolios.com](http://www.harvestportfolios.com); or on SEDAR at [www.sedar.com](http://www.sedar.com).

# Harvest Healthcare Leaders Income ETF

## CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly or quarterly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

## INVESTMENT PRODUCT

The Harvest Healthcare Leaders Income ETF (the “Fund”) invests in an equally-weighted portfolio of 20 Equity Securities<sup>1</sup> that are included in the Health Care sector of the Global Industry Classification Standards<sup>1</sup> or, if such industry classification system is no longer made available by MSCI Inc. and Standard & Poor’s, any other internationally recognized industry classification system at the time of investment and whose underlying business includes, but is not limited to, the provision of healthcare goods and services, including manufacturing and distributing healthcare products, equipment, supplies and technologies, producing and marketing of pharmaceuticals and biotechnology products, and/or engaging in research and development, each with a market capitalization of at least US\$5 billion.

---

<sup>1</sup> As defined in the Fund’s prospectus dated June 15, 2021.

## PRESIDENT'S MESSAGE

### Unitholder letter March 2022

#### Dear Valued Investor,

Thank you for placing your trust and confidence in Harvest's investment philosophy through 2021. It is a philosophy that held strong in our ETFs and funds in the past year, and one we will remain committed to in 2022.

As you know, at Harvest Portfolios Group Inc., we are equity investors. All our products are either equity income funds or equity growth focused funds. This is by design in order to take advantage of the long-term growth of capital markets, the growth of industries and the growth of well positioned and managed companies.

Since the dawn of the industrial age, businesses have accounted for the great majority of wealth creation around the world. Regardless of all the disruption that has occurred over the last 300 years, the surge and implementation of ideas and innovation has advanced humanity to higher living standards and longer life spans.

Wealth is not created in subdued societies or by government handouts. It is created in free and open markets where creative people can build their ideas and dreams into global businesses. We are surrounded by these visionary individuals and companies, and we celebrate their innovation continuously.

At Harvest, we invest in those long-term, growth-oriented, industries and mega-trends that show great promise and the signs of progressive change. We aim to select the best businesses in those industries. Businesses with track records of success, solid management teams, and earnings growth.

As a unitholder, you own one of our Harvest ETFs, mutual funds, or market traded closed end funds. That means many of you very likely experienced good returns over 2021. It was a surprisingly good year for markets, returns were well above the norm for most equity markets. Though it was a very enjoyable rise, we expect to see markets trend back into their longer-term norms which fall roughly in the 8%-10% range, depending on which time period you use.

It is in moments like these when your trust in our philosophy proves its value. If you own quality equities, those longer-term returns will provide ample compound growth for your future needs. If you are retired or planning to retire soon, a basket of quality equities generating an attractive distribution is positioned to help grow your capital over time and supplement your income.

As an investor, you will always have to deal with market noise. Currently, that noise is focused on levels of inflation and potentially higher interest rates.

We agree that current inflation levels are running higher than normal, due to a slowdown in production in many industries, a shortage of readily available workers at all levels of manufacturing and services, and disruptions in logistics and delivery systems. This is occurring in a period of much higher demand than was anticipated early in 2021.

Inflation pressure is not just a Canadian or North American issue, it is global in nature and will take time to right itself. This "demand" inflation is creating pressure on Central Banks to step up interest rates in order to tame the potential of it getting out of control.

While interest rate increases may be on the horizon, we believe fewer should be expected. What we are facing can be described as acute symptoms, not a chronic condition. Prior to the pandemic, longer term trends exhibited a pattern of declining inflation. We believe that those conditions still exist, they are just obscured in the current environment.

At Harvest, we make investment decisions based on industry and business fundamentals. We would not let a potential change in interest rate policy influence our decisions. Those types of short-term factors are for traders. We are not traders, we are investors.

As we look ahead to 2022, we remain steadfast in our philosophy of choosing long term growth industries or mega-trends. Our outlook on these mega trends is framed by our orientation towards high quality companies and long-term trends.

Where growth areas like travel or blockchain may be considered themes by some, we view them quite differently. We see the well-established, long-term growth trajectory of the travel industry. We see the fast adoption of efficient and digitally secure blockchain technology. We see these and our other funds as positions or proxies on long term growth for these industries and mega-trends.

## Harvest Healthcare Leaders Income ETF

Choose the industry first, choose where you think the puck is going, then drill down and start to find the standout businesses that can expand in those industries. That is how we approach investing.

Investing is not static and we have to fine tune and make changes from time to time. In general, when we take a position, it is to hold for the longer term. That could mean holding a position for 5 years or more especially, in our equity income funds.

Let me again thank you for your support and confidence in the Harvest team and our products. Let me assure you that we will remain steadfast in our management and development of products to meet the needs of investors for both income and growth.

Sincerely,

*Signed* "Michael Kovacs"

Michael Kovacs,

President and Chief Executive Officer

## MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Fund. For your reference, the annual financial statements of the Fund are attached to the annual management report of fund performance. You may obtain additional copies of these documents at your request, and at no cost, by calling toll free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at [www.harvestportfolios.com](http://www.harvestportfolios.com); or on SEDAR at [www.sedar.com](http://www.sedar.com).

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

## INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been created to provide investors with a unique exposure to a portfolio of Equity Securities that are included in the Health Care sector of the Global Industry Classification Standards (or, if such industry classification system is no longer made available by MSCI Inc. and Standard & Poor's (or, if applicable, any successor of either of these entities), any other internationally recognized industry classification system at the time of investment and whose underlying business includes, but is not limited to, the provision of healthcare goods and services, including manufacturing and distributing healthcare products, equipment, supplies and technologies, producing and marketing of pharmaceuticals and biotechnology products, and/or engaging in research and development, each with a market capitalization of at least US\$5 billion.

The Fund's investment objectives are to provide unitholders with:

- (i) the opportunity for capital appreciation; and
- (ii) monthly cash distributions.

To achieve its investment objectives, the Fund will invest in an equally-weighted portfolio of Equity Securities of 20 Healthcare Issuers<sup>1</sup> from the Healthcare Leaders Investable Universe<sup>1</sup> that have a market capitalization of at least US\$5 billion at the time of investment and meet the investment characteristics described below. In order to seek to generate additional returns, the Manager will sell call options on no more than 33% of the Equity Securities of each Healthcare Issuer held in the Fund.

Harvest will quarterly reconstitute and rebalance the Portfolio such that, at the time of the initial investment and immediately following each quarterly reconstitution and rebalancing, will have the following investment characteristics:

- Value** – An average Price-to-Earnings ratio lower than the average for the Healthcare Leaders Investable Universe; and
- Quality** – An average 5-year Return on Equity greater than the average for the Healthcare Leaders Investable Universe.

## RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

## RESULTS OF OPERATIONS

The Fund returned 23.79% for Series A, 23.06% for Series B and 23.84% for Series U compared to the MSCI World Health Care Net Total Return Index (USD) of 19.80% for the year ending December 31, 2021. The primary reason for the divergence is that the index is market capitalization weighted, holding companies that do not have liquid options and hold international positions that are priced in foreign currencies while the index is not currency hedged. In addition, large capitalization health care stocks, where the Fund is primarily invested, generally outperformed the mid-capitalization and smaller market capitalization stocks during the year, adding to the Funds relative performance.

The three primary long-term drivers for the healthcare sectors remain unchanged: Aging populations, technological innovation (devices and drugs) and growth from developing markets, where there is a disproportionate share of increased wealth expended on healthcare needs. These medium to longer term drivers remain in-tact and form the basis of our longer-term positive view on the sector. Over the past several years, the sector has had several headwinds driven in large part by sentiment towards the sector that has been muted driven by the political rhetoric in the United States as they grapple with rising out of pocket healthcare expenditures.

---

<sup>1</sup> As defined in the Fund's prospectus dated June 15, 2021.

# Harvest Healthcare Leaders Income ETF

There have been several positive shorter-term factors that we believe have improved the sentiment and attractiveness of the sector since prior to the onset of the pandemic in 2020. Firstly, the fact that Joe Biden became President of the United States has significantly reduced the extreme political rhetoric seen pre-election throughout 2019. The Democratic Party's policy initiatives are seen as centrist with potential outcomes well known. Proposed policy initiatives that were included in the Build Back Better stimulus bill were also seen to have marginal impact on the sector although Congressional approval of the package remained outstanding early through the first quarter. This, coupled with the immediate response by the healthcare industry to mobilize significant financial and human capital quickly and efficiently highlights their commitment to finding treatments and potential vaccines. This has improved the public perception and investor sentiment and has started to result in valuation metrics improving relative to the broader market. Lastly, healthcare is known for its superior good status and has often performed well during uncertain times. Particularly for the drug manufacturers, the necessity of their goods during robust economic times and during recessions, provides for some insights and clarity into the financial performance over the near to medium term.

During the year, there were many gyrations in several areas of the broader market and across investing styles with media commenters highlighting the shift from growth to value investing and out of momentum into cyclicals. These market gyrations continued through the back half of the year and into early 2022 as the macro narrative shifted towards supply chain issues while inflationary pressures that were thought to be transient have remained elevated. This has increased the uncertainty around interest rate policies in the United States and has also increased the prospects of the Federal Funds rate being raised significantly higher in 2022. This, coupled with heightened geopolitical tensions has resulted in some uncertainty and exacerbated some of the rotations seen throughout 2021. Specifically in Healthcare, the relative out-performance of larger capitalization companies with established products, where the Fund is primarily invested, significantly out-performed the smaller capitalization companies, many with new or un-proven franchises. This is driven in part by the fact that many established large capitalization Healthcare companies have high quality financial metrics, visibility into their operations and financials across market cycles and have attractive valuations at a time when some areas of the market lack visibility or for a variety of reasons and are more exposed to interest rate movements. The shorter-term visibility into the underlying businesses, attractive valuations, improved investor sentiment and political climate, coupled with the long term structurally positive macro drivers, lay the foundation for our positive outlook for the sector.

The Fund was invested in 20 Healthcare Leaders during the period and remains positioned for a recovery in sentiment within the sector. The Fund made minor changes to the sub-sector allocations during the period and remain diversified across the Medical Equipment, Pharmaceuticals, Tools & Diagnostics, Biotechnology, and Health Care Services & Facilities sub-sectors. The Fund sold call options on the underlying holdings during the period to meet its investment and income objectives.

## RECENT DEVELOPMENTS

The spread of the coronavirus ("COVID-19") has caused volatility in the global financial markets and impacted the global economy. The ongoing emergence of variants continue to add uncertainty to the global economy. Although financial markets have been strong over the past year, this uncertainty may have an impact on the financial performance of the Fund's investments and the Fund's future investment results may be materially adversely affected.

## RELATED PARTY TRANSACTIONS

There were no related party transactions during the reporting period, except for management fees and other expense reimbursements paid to Harvest, as noted below in Management and Other Fees.

## MANAGEMENT AND OTHER FEES

The Manager is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.85%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund.

### Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial services, interest, taxes, legal, audit fees, transfer agency services relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

### Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs

## Harvest Healthcare Leaders Income ETF

incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and series of each applicable fund. These expenses were \$309,788 for the year ended December 31, 2021 (2020 - \$302,221) and are included in the unitholder reporting costs on the Statements of Comprehensive Income (Loss) in the financial statements.

### **Waivers and absorptions**

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the year ended December 31, 2021 or 2020. The Manager absorbed \$368,659 of expenses of the Fund for the year ended December 31, 2021 (2020 – \$364,069). The Manager may cease doing so at any time without notice to unitholders. The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

### **RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE**

The Independent Review Committee tabled no special reports and made no extraordinary material recommendations to management of the Fund during the year ended December 31, 2021.

# Harvest Healthcare Leaders Income ETF

## FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the year ended December 31, 2021 and past annual periods. This information is derived from the Fund's past annual audited financial statements.

### Series A

THE FUND'S NET ASSETS PER UNIT	2021	2020	2019	2018	2017

### Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Series U commenced operations on February 3, 2017 with net assets of \$10.40 (\$8.00 USD). Series B commenced operations on March 10, 2020 with a net asset value per unit of \$8.00.
- Distributions were paid in cash or reinvested in additional units of the Fund.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trading expense ratio in prior periods was not re-stated.

## Harvest Healthcare Leaders Income ETF

6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
7. The USD amount of the net assets at the end of the year was \$9.14 USD.

# Harvest Healthcare Leaders Income ETF

## Past Performance

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

## YEAR-BY-YEAR RETURNS

The following charts present the Fund's performance for each of the years shown and illustrate how the Fund's performance varied for Series A, Series B, and Series U. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

### Fund Performance

#### Series A

2014 represents the period from December 18 to December 31

#### Series B

2020 represents the period from March 10 to December 31

# Harvest Healthcare Leaders Income ETF

Series U (USD)

2017 represents the period from February 3 to December 31

## ANNUAL COMPOUND RETURNS

The following table shows the annual compound returns for the Fund. All returns are in Canadian dollars, on a total return basis, net of fees.

For comparison purposes, the MSCI World Health Care Net Total Return Index (USD) (the “Index”) is used. While the Fund uses this benchmark for long-term performance comparisons, it is not managed relative to the composition of the Index. As a result, the Fund may experience periods when its performance is not aligned with the Index, either positively or negatively. The return of the Index is calculated without the deduction of management fees and fund expenses whereas the performance of the Fund is calculated after deducting such fees and expenses. Please see the “Results of Operations” section of this report for a discussion on recent performance.

Investment Return %	1 Year	3 Years	5 Years	10 Years	Since Inception*
Series A Performance	23.79	14.00	11.54	-	7.88
MSCI World Health Care Net Total Return Index (USD)	19.80	18.79	15.53	-	10.34
Series B Performance	23.06	-	-	-	15.23
MSCI World Health Care Net Total Return Index (USD)	19.80	-	-	-	23.29
Series U Performance (USD)	23.84	14.97	-	-	12.05
MSCI World Health Care Net Total Return Index (USD)	19.80	18.79	-	-	15.11

\*Since inception is December 18, 2014 for Series A, March 10, 2020 for Series B, and February 3, 2017 for Series U.

#### CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest and the risks detailed from time to time in the Fund's prospectus or offering memorandum. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in the Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, the Fund does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.
