Harvest Global REIT Leaders Income ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly or quarterly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

INVESTMENT PRODUCT

The Harvest Global REIT Leaders Income ETF (the “Fund”) invests in an actively managed portfolio of Equity Securities¹ of not less than 20 REIT Issuers¹ and not more than 30 REIT Issuers, chosen from the REIT Leaders Investable Universe¹ that immediately following each quarterly reconstitution (i) have a market capitalization of at least \$2 billion at the time of investment; and (ii) have only Equity Securities that are listed on a recognized stock exchange of a developed market. In order to provide diversified exposure for Canadian investors that are seeking exposure to the REIT sectors, the Fund aims to primarily focus on REIT Leaders¹ with operations and/or offices outside of Canada.

¹ As defined in the Fund’s prospectus dated June 6, 2022

INVESTMENT OBJECTIVES AND STRATEGY

The Fund has been created to provide investors with a unique exposure to an actively managed portfolio of Equity Securities of not less than 20 REIT Issuers and not more than 30 REIT Issuers, chosen from the REIT Leaders Investable Universe that immediately following each quarterly reconstitution (i) have a market capitalization of at least \$2 billion at the time of investment; and (ii) have only Equity Securities that are listed on a recognized stock exchange of a developed market. In order to provide diversified exposure for Canadian investors that are seeking exposure to the REIT sectors, the Fund aims to primarily focus on REIT Leaders with operations and/or offices outside of Canada.

The Fund's investment objectives are to provide unitholders with:

- (i) the opportunity for capital appreciation;
- (ii) monthly cash distributions; and
- (iii) lower overall volatility of portfolio returns than would otherwise be experienced by owning Equity Securities of the REIT Leaders directly.

In order to seek to generate additional returns, the Manager will sell call options on no more than 33% of the Equity Securities of each REIT Leader held in the Fund.

Harvest will quarterly reconstitute and rebalance the Portfolio.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund returned -26.92% for the period ended June 30, 2022 compared to the MSCI World Real Estate Investment Trusts Gross Total Return Local Index (USD) (the "Benchmark") of -18.48%. Note, this Benchmark is not an investable Index.

After a strong 2021, with REITs rising on building inflationary pressures and yet still low interest rates, the performance has suffered in the first half of 2022, as inflationary pressures were exacerbated by the Russia's invasion of Ukraine. This caused interest rates to move higher with central banks globally starting to accelerate their move away from emergency rates near zero. With macro uncertainty and volatility surrounding how quickly interest rates will move; all asset classes were under pressure.

While there were numerous REIT sub-categories that suffered during the period, especially those tied into to areas with greater reliance on growth and those with higher multiples (tighter cap rates), there were some areas in the Fund that exhibited their more defensive character. Those areas such as retail strip plazas and single tenant essential properties, single family homes, and primary care facilities in Europe all seemed to navigate this period with somewhat better downside protection. Communication towers and data centers sold off, but not as badly as other more expensive REITs, with a strong secular long-term tailwind at their back.

Additionally, during the period the Fund exited a long-held position in Orpea, one of the largest European operators of Senior Homes Facilities. It came to light that certain business practices have come under investigation, and due to the likely length of the issue and uncertainty around the future outlook, it was prudent to exit the name at a loss and look for opportunities elsewhere.

The Fund was invested in 27 global REIT Leaders at the end of the period and remains well diversified across many differentiated sub-sectors of real estate and with assets in many countries around the globe. With limited exposure to the

Canadian market, the Fund can even offer diversification benefits for Canadian REIT investors. The Fund selectively wrote covered calls to meet its investment objectives and strategies.

RECENT DEVELOPMENTS

The spread of the coronavirus has caused volatility in the global financial markets and impacted the global economy. Locally and globally restrictions have eased and appear to be less likely in the future however the lasting effects of the previous restrictions have impacted the economy with rising inflation and resulting rising interest rates. In addition to this, the war in Ukraine has further contributed to rising inflation and has added to the economic and financial markets instability. Both events have significantly impacted global economies and financial markets and there is uncertainty as to how long this will last or the impact on the financial performance of the Fund's investments and the Fund's future investments.

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Net assets, at the commencement of operations on June 21, 2017 was \$10.00.
- Distributions were paid in cash or reinvested in additional units of the Fund.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trade expense ratio in prior periods was not re-stated.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
