

**INTERIM MANAGEMENT REPORT OF FUND
PERFORMANCE**

Harvest Canadian Income & Growth Fund

June 30, 2023

Harvest Canadian Income & Growth Fund

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly or quarterly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

INVESTMENT PRODUCT

The Harvest Canadian Income & Growth Fund (the “Fund”) invests to provide investors with income and the potential for capital appreciation by investing primarily in dividend paying securities of publicly traded utilities, industrials, communications, real estate and retail issuers domiciled in Canada.

Harvest Canadian Income & Growth Fund

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Fund. For your reference, the interim financial statements of the Fund are attached to the interim management report of fund performance. You may obtain additional copies of these documents at your request, and at no cost, by calling toll free at 1(866) 998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Road, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestportfolios.com; or on SEDAR at www.sedar.com.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund's investment objectives are to:

- (i) provide unitholders with monthly distributions; and
- (ii) maximize long-term total return for unitholders while reducing volatility.

The Fund was created to provide investors with income and the potential for capital appreciation.

To achieve the Fund's objectives, the Fund invests in an actively managed portfolio comprised primarily of dividend-paying equity and debt securities of publicly-traded utilities, industrial, communications, real estate and retail issuers domiciled in Canada. The investment manager focuses on the less cyclical segments of the Canadian equities market with the goal of reducing volatility by diversifying away from the main sectors (financials, energy and materials) that make up the majority of the market capitalization on the Toronto Stock Exchange (the "TSX").

The Fund invests primarily in companies that have: (i) proven long-term histories of earnings; (ii) established and experienced management; and (iii) business models that are not primarily dependent on commodity prices.

The investment manager focuses on free cash flow and free cash flow yield, earnings potential, and the investment's intrinsic value in order to assess dividend sustainability and growth in distributions, with a view to delivering:

1. Attractive income generation;
2. Opportunity for capital gains; and
3. Lower volatility relative to the overall S&P/TSX Composite Index.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund returned 3.16% for Series R, 3.02% for Series A, 3.74% for Series F and 3.74% for Series D compared to the S&P/TSX Composite Total Return Index return of 5.70% for the six-month period ended June 30, 2023. The Fund remains diversified and continues to be primarily focused in on a portfolio of Canadian equity securities in the utilities, industrials, communications, and real estate sub-sectors, augmented with select U.S. equities.

After a challenging 2022 for the broader Canadian markets, the Canadian stock market has traded in more of a rangebound manner thus far in 2023. However, it has not been uniform and experienced rollercoaster-like ups and downs during the six-month period. Two of the bigger drivers during the six-month period have been the banking crisis in the United States and shifting central banking pathways on interest rates.

Insurance stocks gained during the six-month period which the Fund missed out on. Conversely, the Fund's lack of exposure to banks—especially compared to the benchmark's heavy exposure to banks—helped it avoid exposure to contagion and poor sentiment around banks stemming from the U.S. banking crisis in March.

Other names that added to performance during the six-month period were Savaria Corporation and Boyd Group Services Inc., as they navigated through earnings and capitalized to some degree on the return to the growth style stocks that was more broadly witnessed. Restaurant Brands International Inc., parent of companies such as Tim Hortons, also performed well, with coffee and quick-service food seemingly unaffected by concerns about recessionary impacts that other have more economically sensitive exposures. The same is applicable for Alimentation Couche-Tard Inc., the operator of convenience stores and gas stations is currently the largest weighting in the Fund. Its business model is less impacted than many other

Harvest Canadian Income & Growth Fund

more economically sensitive companies during recessionary periods. Meanwhile the company has dedicated ample time and focus to prepare the business from the ongoing shift away from fossil fuels towards electric vehicles.

As mentioned above, in March some U.S. regional banks were faced with significant cash withdrawals over a very short period that put their operations under pressure and very quickly resulted in bankruptcies and forced asset sales. This caused significant volatility in equity markets that also impacted Canadian markets, with spikes up and down in a short period across stocks as concerns that the regional bank failures would inspire contagion across the banking sector and potentially lead to a broader financial crisis. The contagion risk was quickly subdued as the U.S. government intervened to ensure financial stability within the banking sector. Nevertheless, the crisis made for a challenging environment. Similarly, many of the issues that were front and center during 2022, such as rising prices and central banks raising interest rates, appear to have subsided during 2023 as did headline risks for further geopolitical escalation and reduced potential for broader geographic contagion from the Russian invasion of Ukraine.

The information technology sector was the clear standout to start 2023 in North American markets, as traditional “growth” sectors, led by large capitalization technology companies, rebounded from 2022. Artificial intelligence gained favour as the hot topic and garnered a lot of the media hype. While the Fund’s holding in CGI Inc. performed quite well during the six-month period, Shopify, not owned by the Fund, still commands a large weight in the benchmark and had outsized returns. Thus, the information technology sector would be the biggest source of relative performance for the Fund versus the benchmark during the six-month period.

Commodities had a bit of a weaker six-month period of performance, as they gave back some of the gains witnessed in the prior two years. This can be tied to the fading headlines of the Russian invasion of Ukraine and the downward adjustments of crude oil supply by OPEC+, a cartel of oil producing countries. In addition, China’s demand growth forecasts also declined after heightened expectations coming out of COVID-zero policies were not met. Resource stocks dragged on the benchmark performance, with the energy sector negative and materials also experiencing relatively weak performance. Given that the Fund does not have pure exposure to these sectors (outside of related sectors such as energy pipelines as utilities), this was beneficial to its relative performance.

RECENT DEVELOPMENTS

COVID-19 and the war in Ukraine have had significant impacts to the global economy over the last few years and have contributed to the current inflationary pressures. The significant increase in interest rates globally by central banks to address inflation has increased the likelihood of a global recession impacting financial markets and global economies which may impact the financial performance of the Fund’s investments.

RELATED PARTY TRANSACTIONS

There were no related party transactions during the six-month reporting period, except for management fees and other expense reimbursements paid to Harvest, as noted below in Management and Other Fees.

MANAGEMENT AND OTHER FEES

The Manager is responsible for managing the Fund’s overall business and operations and provides key management personnel to the Fund. Each series of units pays the Manager an annual management fee, plus applicable taxes, based on a percentage of the average daily net asset value (“NAV”) of the Fund attributable to that applicable series (the “Management Fee”).

Dealers may be paid a servicing fee in connection with Series A and Series R units for ongoing services they provide to investors, including investment advice, account statements and newsletters. Generally, the servicing fees, plus applicable taxes, are payable monthly in arrears based on the total client assets invested in each series of units of the Fund held by all of a Dealer’s clients throughout the month. The Manager can change or cancel servicing fees at any time.

The fees differ among the series of units of the Fund as set out in the chart below:

Fund Series	Annual Management Fee	Dealer Service Fee	Total Fees
R	1.25%	1.00%	2.25%
A	1.25%	1.25%	2.50%
F	1.25%	0.00%	1.25%
D	1.25%	0.00%	1.25%

Effective May 1, 2022 the Fund no longer pays service fees on Series D units. Prior to this change, the Fund paid a servicing fee of 0.25% to dealers based on the total client assets invested in Series D units. If the service fee had been charged to the entire year, the MER for 2022 would have been higher by 0.19% and would have been 4.90%.

Harvest Canadian Income & Growth Fund

Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial services, interest, taxes, legal, audit fees, transfer agency services relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and series of each applicable fund. These expenses were \$28,175 for the six-month period ended June 30, 2023 (2022 - \$22,915) and are included in the unitholder reporting costs on the Statements of Comprehensive Income (Loss).

Waivers and absorptions

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers or expense absorptions for the six-month period June 30, 2023 or 2022. The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

RECOMMENDATION OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The Independent Review Committee tabled no special reports and made no extraordinary material recommendations to management of the Fund during the six-month period ended June 30, 2023.

Harvest Canadian Income & Growth Fund

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the six-month period ended June 30, 2023 and past annual periods. This information is derived from the Fund's interim financial statements and past annual audited financial statements.

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Distributions may be paid in cash or automatically reinvested into additional units.
3. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trading expense ratio in prior periods was not re-stated.
5. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Canadian Income & Growth Fund

Past Performance

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

YEAR-BY-YEAR RETURNS

The following charts present the Fund's performance for each of the years shown and illustrate how the Fund's performance varied for Series R, Series A, Series F and Series D. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year except for 2023 which represents the interim period.
