Harvest Clean Energy ETF

Capturing the Rise of Renewables

September 2024

Investing in the Clean Energy Revolution

**Long Term
Growth Potential**

**Social
Demand**

**Investments in
Renewables**

What is Classified as Clean Energy?

The term “clean” or “carbon-free” energy refers to electricity that is generated by facilities that do not directly emit greenhouse gases like carbon dioxide during electricity production.

Examples of clean energy include:

Nuclear

Hydroelectric

Solar

Wind

Geothermal

What are the Long-term Drivers?

- Wind and Solar Photovoltaic (PV) Technologies
- Electric Vehicle (EV) Market
- Heat Pump Market
- Nuclear Energy Growth
- Hydrogen Electrolyser Proliferation

Global renewable energy deployment reached record highs in 2023. Annual additions of solar PV and wind grew 85% and 60%, respectively, over the prior year. Growth of these clean energies in China accounted for the majority for both.

Nearly 14 million new electric vehicles (EVs) were registered globally in 2023, according to the International Energy Agency. That brings the current global tally to 40 million EVs. EV sales rose 35% from 2022 to 2023.

How Clean Energy is Powering Artificial Intelligence

Artificial intelligence (AI) is a major technological change agent in our evolving world. Generative AI is changing the very nature of work. However, AI requires energy – lots of it, in fact. The energy generation systems that currently exist do not have enough resources to meet the surging demand.

“Significant investment will be required to upgrade the infrastructure and real estate needed to handle the insatiable appetite for data and resulting rapid increase in power demand.

Brookfield Renewable

Harvest Clean Energy ETF

Investing in the Clean Energy Industry

The Harvest Clean Energy ETF invests in a portfolio of the 40 largest Clean Energy Issuers selected from the Clean Energy investable universe ("Universe") to provide unitholders with the opportunity for capital appreciation. The Universe includes equity securities that are listed on select North American, European and developed Asian stock exchanges that are categorized as renewable energy or renewable energy generation. The portfolio is equally weighted and follows a systematic process in selecting the top 40 largest Clean Energy Issuers measured by market capitalization and is reconstituted and rebalanced semi-annually.

Harvest believes that the changing landscape for renewable energy production and investment represents a long term structural change and is an environment that the Clean Energy sub-sectors are well positioned to benefit from over the long term.

Investment Highlights

- Low risk and low volatility
- Flexibility of an ETF
- Portfolio diversification
- Competitive management fee: 0.10%

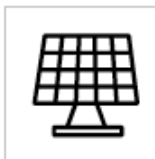

Two Categories with the Diverse Set of Clean Energy Industries

Renewable Power Generation

Companies that produce substation power from renewable energy

Renewable Equipment & Services

Companies engaged in solar equipment & services, biofuels, wind equipment & services, energy storage, hydrogen & fuel cell equipment, and diversified renewable equipment

About Harvest

Founded in 2009, Harvest Portfolios Group Inc is an independent Canadian Investment Fund Manager. At Harvest, our guiding principles are premised on building wealth for our clients through ownership of strong businesses that have the potential to grow and generate income over the long term. Harvest has an established track record with its stable of equity ETFs and fixed income ETFs. Now, in 2024, Harvest now offers exposure to balanced income ETFs. These ETFs are invested in exchange-traded funds that are listed on a recognized North American stock exchange that provide exposure towards large capitalization equity securities, investment grade bonds, or money market instruments issued by corporations or governments, and will include ETFs that engage in covered call strategies.

Disclaimer

For Information Purposes Only. Commissions, management fees and expenses all may be associated with investing in HARVEST Exchange Traded Funds managed by Harvest Portfolios Group Inc. (the "Funds" or "ETFs"). Please read the relevant prospectus before investing. The Funds are not guaranteed, their values change frequently, and past performance may not be repeated. This communication should not be considered as advice and/or a recommendation to purchase or sell the mentioned securities or used to engage in personal investment strategies. Tax, investment and all other decisions should be made with guidance from a qualified professional.

Distributions are paid to you in cash unless you request, pursuant to your participation in a distribution reinvestment plan, that they be reinvested into Class A units of the Fund. If the Fund earns less than the amounts distributed, the difference is a return of capital.

Certain statements included in this communication constitute forward-looking statements ("FLS"), including, but not limited to, those identified by the expressions "expect", "intend", "will" and similar expressions to the extent they relate to the Fund. The FLS are not historical facts but reflect Harvest's, the Manager of the Fund, current expectations regarding future results or events. These FLS statements are subject to a number of risks and uncertainties that could cause actual results or events to differ materially from current expectations. Although Harvest, the Manager of the Fund, believes that the assumptions inherent in the FLS are reasonable, FLS are not guarantees of future performance and, accordingly, readers are cautioned not to place undue reliance on such statements due to the inherent uncertainty therein. Harvest, the Manager of the Fund, undertakes no obligation to update publicly or otherwise revise any FLS or information whether as a result of new information, future events or other such factors which affect this information, except as required by law.

The ETF is listed for trading on the TSX under the ticker symbol HCLN.
