| Harvest Fixed Income ETFs

Harvest Fixed Income ETFs provide investors the opportunity to invest in intermediate to long-duration US Treasury bonds, and short-term treasury bills (T-Bills) of the Government of Canada. These are among the safest long-term and short-term bonds, as they are backed by the full faith and credit of the US and Canadian Governments, respectively. The Harvest Fixed Income ETFs Suite delivers three separate ETFs that cover the maturity spectrum:

HPYT | Harvest Premium Yield Treasury ETF

Focuses on the long maturity segment of 20+ years by investing in US Treasury ETFs

HPYM | Harvest Premium Yield 7-10 Year Treasury ETF

Focuses on the intermediate maturity segment of 7-10 years by investing in US Treasury ETFs

TBIL | Harvest Canadian T-Bill ETF

Focuses on the short maturity segment of 0-3 months by investing in the Government of Canada T-Bills

| The Harvest ETFs Covered Call Strategy

By adding the time-tested Harvest covered call strategy to HPYT and HPYM, investors have an expanded foundation for monthly income. It serves to garner premium income through the active selling of call options on the portfolios' holdings. An investor will receive high monthly cash distributions while benefiting from the credit quality of US Treasuries held in the underlying ETFs.
