## The Harvest Call Option Writing Strategy

Harvest is one of the largest investment fund companies engaged in call option strategies in Canada. Our investment team has decades of experience in both option writing and equity investing. We use an active covered call writing strategy to generate tax efficient income and help reduce volatility in our ETFs.

The income, also known as an option premium or a premium, is generated from writing covered calls. This income can be treated as a capital gain. That makes the income from covered calls more tax efficient than other forms of income. Moreover, these premiums protect against the downside up to the amount received at the time of establishing the option contracts.

### Key to a Successful Strategy: Active and Flexible

To achieve the income objective of our ETFs while allowing for strong potential capital appreciation, Harvest employs flexibility in its option writing decisions in these four areas:

#### 01 Flexible Write Mandate:

Writing on all, a few or none of the ETF's holdings allows the portfolio manager to react to changing conditions (macro or company specific) in real time.

#### 02 Flexible Write Level:

Harvest maintains a flexible write level for its Income ETFs, allowing the portfolio manager the ability to judge market forces for equities and fixed income.

**Equity Income ETFs** – Up to 33%

**High Income Shares ETFs** – Up to 50%

**Fixed Income ETFs** – Up to 100%

#### 03 Flexible Multiple Strike Levels:

The portfolio manager can write several options on individual equity at different strike prices throughout the month to capitalize on strong short-term upward price movement. This allows the ETFs to generate higher premium income and take advantage of short-term pullback on the price of the equity.

#### 04 Flexible Timing:

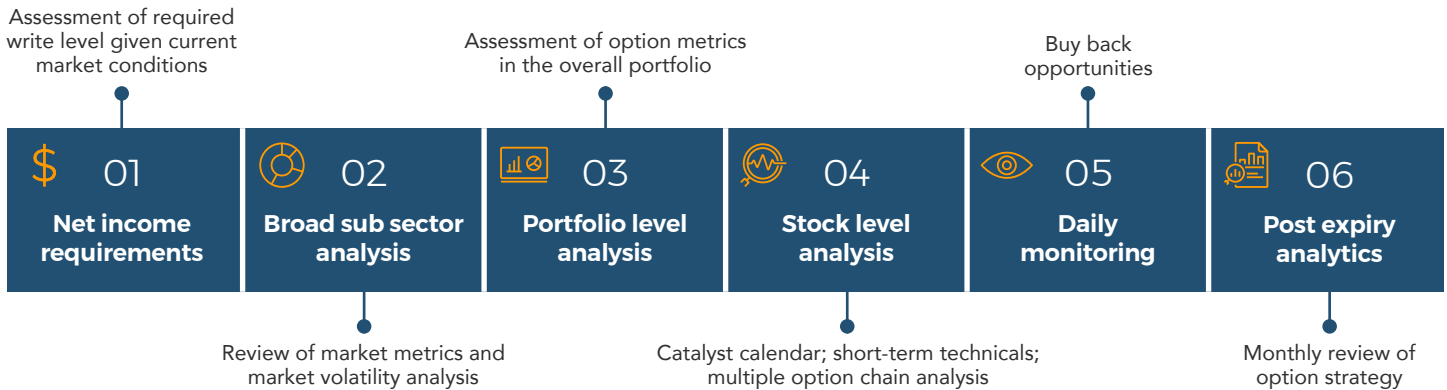

The portfolio manager can enter the positions in whole or in part, at any time during the expiry period. This means having the benefit of multiple strike levels and allows for a tactical approach to maximize capital appreciation while receiving option premiums.

### Active & Flexible Call Option Writing Strategy

## How Harvest Monetizes Returns for Investors

### Monthly Option Process

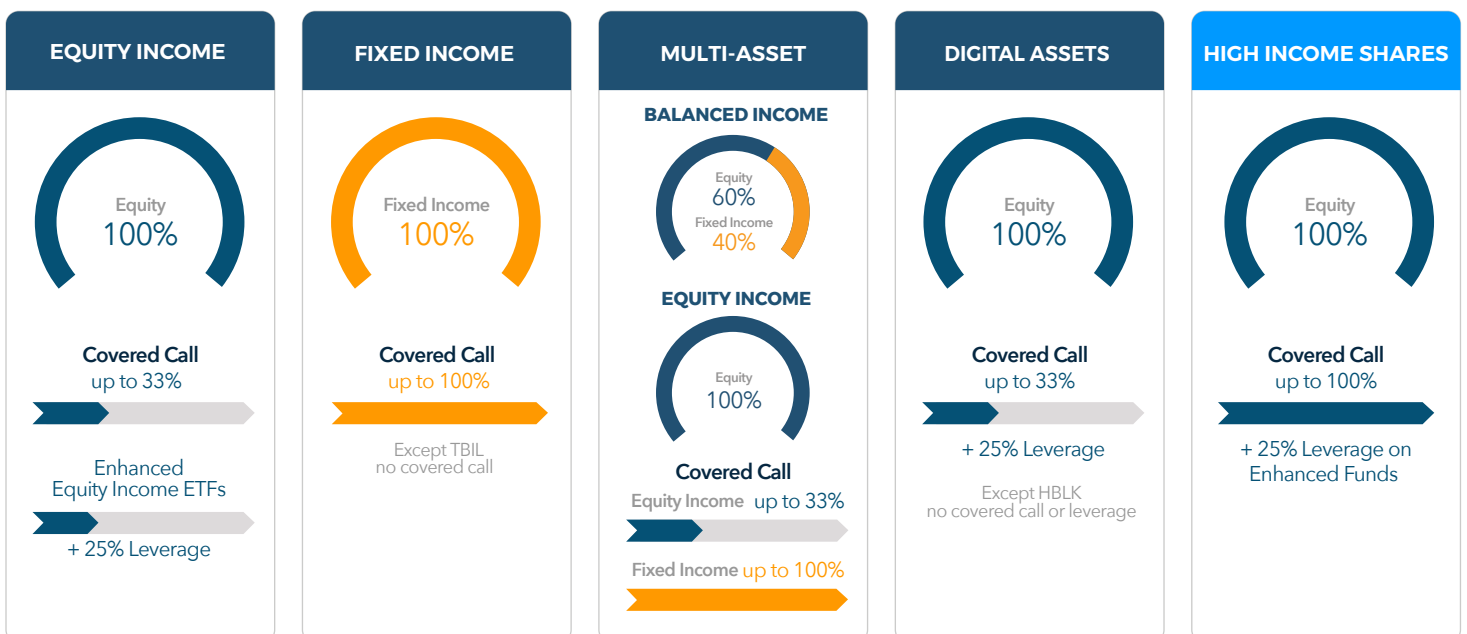

Using Harvest's proprietary model, the investment team will assess the cash flow needs based on the required monthly distribution less current dividend yields. The option contracts are then established and monitored daily.

For any written option, the team can take one of three decisions (1) buy back an option when short-term profits can be attained; (2) Leave the option to expire; or (3) Allow the position to be called away in cases where the market is very strong to the upside. In all cases, the ETF has the benefit of the premium at its disposal.

## Benefits of Covered Call ETFs

Harvest ETFs is a market leader in covered call option ETFs. A covered call strategy generates additional cashflow from the underlying investments in a portfolio. Moreover, it seeks to reduce risk compared to non-covered call portfolios. Harvest launched its first covered call ETF in 2016. Since then, Harvest ETFs has established itself as one of the top option writing firms in Canada.

### Disclaimer

Commissions, management fees and expenses all may be associated with investing in Harvest ETFs and Harvest High Income Shares ETFs managed by Harvest Portfolios Group Inc. (the "Funds" or a "Fund"). Please read the relevant prospectus before investing. The funds are not guaranteed, their values change frequently and past performance may not be repeated. Tax, investment and all other decisions should be made with guidance from a qualified professional. The above is for general information purposes only and does not constitute advice or a solicitation to buy or sell the securities referred to within.

Distributions are paid to you in cash unless you request, pursuant to your participation in a distribution reinvestment plan, that they be reinvested into Class A, Class B and Class U units of the Fund.

Certain statements included in this communication constitute forward-looking statements ("FLS"), including, but not limited to, those identified by the expressions "expect", "intend", "will" and similar expressions to the extent they relate to the Fund. The FLS are not historical facts but reflect Harvest's, the Manager of the Fund, current expectations regarding future results or events. These FLS statements are subject to a number of risks and uncertainties that could cause actual results or events to differ materially from current expectations. Although Harvest, the Manager of the Fund, believes that the assumptions inherent in the FLS are reasonable, FLS are not guarantees of future performance and, accordingly, readers are cautioned not to place undue reliance on such statements due to the inherent uncertainty therein. Harvest, the Manager of the Fund, undertakes no obligation to update publicly or otherwise revise any FLS or information whether as a result of new information, future events or other such factors which affect this information, except as required by law.

\* The current yield represents an annualized amount that is comprised of 12 unchanged monthly distributions as a percentage of the closing market price of the Fund. It does not represent historical returns or the performance of the ETF.

\*\* Current Yield information cannot be presented until the ETF has reached its first anniversary of listing per investment fund securities regulations.

\*\*\* Covered calls used in the underlying ETFs
