Harvest Global Gold Giants Index ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly or quarterly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

INVESTMENT PRODUCT

The Harvest Global Gold Giants Index ETF (the “Fund”) seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Global Gold Giants Index TR. The Fund primarily invests in large gold mining issuers that are listed on a regulated stock exchange in North America, Australia or in certain European countries.

PRESIDENT'S MESSAGE

Unitholder letter March 2023

Dear Valued Investor,

Thank you for taking the time to read about Harvest ETFs & Funds in 2022 and our look ahead to 2023.

The past year reminded us of key lessons as investors, advisors, and fund managers. At Harvest Portfolios Group Inc., we were reminded of the importance of our core philosophy for wealth creation and preservation: own great businesses, hold them for the long-term, and generate steady income.

2022 saw central banks hiking key interest rates higher and faster than we, and many others, expected. These were among the highest and fastest rate increases in modern history, driven largely by central banks' goal to tame high and persistent inflation.

It was also a year of high volatility. Interest rate increases played a role, as did geopolitical instability and global economic uncertainty.

In an environment of persistent inflation, rising rates and high volatility, our focus on leading businesses and selling covered call options remained highly effective. Our Equity Income ETFs' defensive characteristics and ability to monetize volatility to generate high yields proved attractive in a turbulent year.

With bonds and equities both underperforming, the reliability of attractive income became a key component of total returns for many investors.

Even as investors have found success with our strategies, there is still a great deal of uncertainty around markets. The U.S. Federal Reserve claims they are trying to combat inflation without pushing the economy into recession. History shows that goal is very rarely achieved, but perhaps lightening up on the brakes early in 2023 could achieve the desired results.

We know that these rate increases will plateau at some point, and we believe we are nearing the end of that cycle. When that time comes, markets will react appropriately and likely move higher. We expect that 2023 will finish positive as rate hikes end and markets process these changes in the economy.

Markets are forward looking indicators, and the economic impact of rate increases are often delayed. This generally means markets recover and begin a growth trajectory before their underlying economies do.

As optimists and believers in the longer-term value of great businesses, we will continue to do what we always have at Harvest. We construct ETFs that hold solid businesses in their sector and use active & flexible covered call strategies to generate income where appropriate. We do that because we believe owning great businesses in the long-term is the best way to build and preserve wealth.

On behalf of Harvest, I would like to thank you for your continued trust and investment in our products.

Sincerely,

Signed "Michael Kovacs"

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Fund. For your reference, the annual financial statements of the Fund are attached to the annual management report of fund performance. You may obtain additional copies of these documents at your request, and at no cost, by calling toll free at 1(866) 998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Road, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestportfolios.com; or on SEDAR at www.sedar.com.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Global Gold Giants Index TR (the "Index"). The Fund primarily invests in large gold mining issuers that are listed on a regulated stock exchange in North America, Australia or in certain European countries.

In order to achieve its investment objectives and to obtain direct or indirect exposure to the Constituent Securities¹ of the Index, the Fund may hold the Constituent Securities of the Index in approximately the same proportion as they are reflected in that Index or may hold securities of one or more exchange traded funds that replicate the performance of the Index, or a subset of such Index. The Fund will invest in its own portfolio comprised of various securities and instruments which may include, but are not limited to, equity and equity related securities. Equity related securities held by the Fund may include, but are not limited to, convertible debt, income trust units, single issuer equity options, preferred shares and warrants. If market conditions require, in order to preserve capital, the Fund may seek to invest a substantial portion of their respective assets in cash and cash equivalents.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the period that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

The Fund returned -4.43% compared to the Solactive Global Gold Giants Index TR of -4.15% for the year ended December 31, 2022.

The Fund tracks the Index which provides investors with a cost effective vehicle to access the world's largest gold companies listed on stock exchanges in select developed markets.

Gold prices witnessed quite a bit of volatility in 2022, initially attracting investors on the Russian invasion of Ukraine, but reverted lower again as geopolitical risks faded into the background and central banks continue their aggressive push to higher interest rates and tighter monetary policy. However, with interest rates nearing a potential terminal rate ceiling and market participants softening their expectations of economic growth, this has turned the market sentiment back toward a dovish expectation of central bank policy looking forward. Thus, gold prices moved up again to close out the year.

Gold producers were directly correlated to the moves in the gold price market and hence the generally flat year-end performance for the sector, but were on a very notable winding path throughout the year as gold saw a high to low spread between \$2,070/oz and \$1,615/oz. Gold equities should be well positioned to capitalize on high commodity prices through the longer cycle and the commodity continues to maintain its status as a safe haven during times of uncertainty and crisis, and as such provides a hedge to portfolios as part of an overall asset allocation strategy.

The Fund was invested in the 20 largest global gold companies by market cap on an equal-weighted basis at the end of the period and are mainly headquartered in Canada, Australia, the UK, and the U.S.

RECENT DEVELOPMENTS

The spread of the coronavirus ("COVID-19") over the last couple of years has had a significant impact on the global economy. Although COVID-19 continues to exist, most countries have largely lifted COVID-19 related restrictions and the world has returned to a more normal level of activity. The lasting impact of COVID-19 has been significant supply chain issues which have begun to subside however persist in some industries, and a significant rise in inflation. Inflationary pressures have been exacerbated by the war in Ukraine and continue to impact global commodity supplies and costs.

¹ As defined in the Fund's prospectus dated November 1, 2022.

Harvest Global Gold Giants Index ETF

Central banks globally have quickly raised interest rates to address inflation although increasing the likelihood for a global recession. The above factors continue to impact global economies and financial markets, and uncertainty of the impact on financial performance of the Fund's investments persists. The Fund's future investment results may be materially adversely affected as a result.

RELATED PARTY TRANSACTIONS

There were no related party transactions during the reporting period, except for management fees and other expense reimbursements paid to Harvest, as noted below in Management and Other Fees.

MANAGEMENT AND OTHER FEES

Harvest Portfolios Group Inc. is the Manager of the Fund and is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.40%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund.

Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial services, interest, taxes, legal, audit fees, transfer agency services relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. Funds, and series of each applicable fund. These expenses were \$3,291 for the year ended December 31, 2022 (2021 - \$3,186) and are included in the unitholder reporting costs on the Statements of Comprehensive Income (Loss) in the financial statements.

Waivers and absorptions

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the year ended December 31, 2022 or 2021. The Manager absorbed \$123,460 of expenses of the Fund for the year ended December 31, 2022 (2021 - \$129,851). The Manager may cease doing so at any time without notice to unitholders. The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

RECOMMENDATION OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The Independent Review Committee tabled no special reports and made no extraordinary material recommendations to management of the Fund during the year ended December 31, 2022.

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Net assets, at the commencement of operations on January 10, 2019 was \$20.00.
- Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held. Included in the above amounts is the reinvested distribution of \$0.23 per unit paid to unitholders of record on December 31, 2022 (2021 - \$1.19 per unit).
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trading expense ratio in prior period was not re-stated.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
