Harvest Global Gold Giants Index ETF

Management Report of Fund Performance

December 31, 2024

Harvest Global Gold Giants Index ETF

PRESIDENT'S MESSAGE

Unitholder Letter March 2025

Dear Valued Investor,

Thank you for placing your trust and confidence in Harvest's investment products through 2024. Harvest ETFs invests in strong, industry-leading companies, and in secular trends. That philosophy has held strong in our ETFs and funds through the past year. We will remain committed to this philosophy going forward.

In 2024, Harvest Portfolios Group Inc. celebrated its 15th year in business. On October 23, 2009, we launched our first income-oriented equity fund – The Harvest Banks & Buildings Income Fund. It was a market traded closed-end fund at the time. Banks and REITs offered some exceptional yields at the tail end of the financial crisis. This would form the basis of Harvest's first monthly income fund. Today, it is a small mutual fund but has a steady 15-year track record of consistent monthly income.

Our company has been a steadfast equity investor. Back in late September of 2023, we expanded into the fixed income space launching two fixed income covered call ETFs that provided exposure to high-quality treasury securities, which have done well with investors. Our focus as an equity investor is grounded in taking advantage of the long-term growth in capital markets, major industries, and the growth of well-positioned and managed companies. Using our finely tuned and time-tested covered call option writing strategy we aim to generate predictable, consistent, and high levels of income for unitholders in both our Equity Income and Fixed Income ETFs.

2024 saw long-term bond rates rise more than expected due to U.S. inflationary pressures. The biggest takeaway over the past year is that expectations can change quickly and significantly over a relatively short period of time in the market. For Harvest covered call treasury ETFs, large movements in the yield curve have been challenging as the funds have longer duration exposure. However, Harvest's approach reiterates that the consistent cash flow is a critical component when bond markets are volatile. This can provide a tactical advantage during times of extreme rate movements, as portfolio managers can write more options, or less options, depending on market dynamics.

Equity markets shined through 2024, finishing in the black for the second year in a row with a 20% upward movement. That was despite a negative December 2024, where the market was impacted by many factors, including tax loss selling and policy rhetoric.

In 2024 we added yet another new category to our product lineup with the launch of Harvest High Income Shares ETFs. High Income Shares ETFs are single stock ETFs that offer exposure to top U.S. companies. These ETFs are overlayed with an active covered call strategy and seek to generate high levels of monthly income.

Harvest ETFs was again honoured the LSEG Lipper Funds Awards Canada 2024 Winner, Harvest Tech Achievers Growth & Income ETF as Best Sector Equity Fund Over 5 Years (Class U) and Best Sector Equity Fund Over 3 Years (Class B). This is the third year in a row as winner of this award. This ETF also announced the 5th and 6th distribution increase in its history.

Today, Harvest manages $5.5 billion for Canadian investors across 45 ETF strategies with most of our products still built on long-term equity mandates with steady monthly income where we have now paid over $1 billion of income to unitholders. We have built a 15-year pedigree of quality and award-winning products for Canadian investors and are proud of our track record.

Moving ahead to 2025, we remain steadfast to our philosophy of choosing long-term growth industries or mega-trends. Our outlook on these industries is framed by our orientation towards high quality companies and long-term trends.

Thank you again for your support and confidence in the Harvest team and our products. We will remain dedicated in our management and development of innovative and income generating products for many years to come.

Sincerely,

Signed "Michael Kovacs"

Michael Kovacs,

President and Chief Executive Officer

Harvest Global Gold Giants Index ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. (“Harvest” or the “Manager”) manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Harvest Global Gold Giants Index ETF (the "Fund"). You can get a copy of the annual financial statements at your request, and at no cost, by calling toll free at 1-866-998-8298; by writing to us at Harvest ETFs, 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at **www.harvestetfs.com**; or on SEDAR+ at **www.sedarplus.ca**.

Unitholders may also contact us using one of these methods to request a copy of the Fund’s proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Global Gold Giants Index TR$^{\gamma}$ (the "Index"). The Fund primarily invests in large gold mining issuers that are listed on a regulated stock exchange in North America, Australia or in certain European countries.

To achieve its investment objective, the Fund will invest directly or indirectly in the constituents of Solactive Global Gold Giants Index TR$^{\gamma}$ to replicate the performance of the Index. The Index intends to track the price movements of the 20 largest gold mining companies, measured by market capitalization, that are listed on a regulated stock exchange in North America, Australia or in certain European countries. Based on market condition the Fund may invest a substantial portion of its assets in cash and cash equivalents.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the year ended December 31, 2024 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the Solactive Global Gold Giants Index TR$^{\gamma}$ for the Period is as follows:

	Return %
Class A	26.68
Solactive Global Gold Giants Index TR$^{\gamma}$	28.48

The Fund tracks the Index which provides investors with a cost-effective vehicle to access the world’s largest gold companies listed on stock exchanges in select developed markets. The Fund was invested in the 20 largest global gold companies by market cap on an equal-weighted basis at the end of the Period and are mainly headquartered in Canada, Australia, the United Kingdom, and the U.S.

Factors Affecting Fund Results

The individual stocks within the Fund performed somewhat in sync, with most names gaining during the Period, especially for those that were not initiated or exited from the Index during the Period. The macro environment (both economic and geopolitical) continues to have some uncertainty. On the economic front, international economies seem to be slowing when compared to the United States.

Within the U.S., there has been a slow down in labor and inflationary pressures, but consumer spending is robust. Central banks around the world have been cutting rates during the Period, including the U.S., despite its shifting expectations of how this cycle will ultimately look. As we exit the Period, there is greater expectations of a shallower rate cutting cycle, with expectations the yield curve in the U.S. normalizes (long bond yields rising above short bond yields) at a higher level. However, despite this, gold and gold equities have been in favour for most of the Period, with very strong performance.

Contributing to the upside of the gold equities, global geopolitical tensions remain elevated. As the conflicts in Eastern Europe and the Middle East prolong, there remain potential threats to the world economies and the stock markets.

Should the uncertainty continue or increase, gold prices should be supported by continued investor demand. Further, as the incoming GOP presidency begins to unfold, the concerns about inflationary policies will likely come to bear over time and that will also determine whether gold prices will be supported by inflation impacts or not.

There were several changes to investments held in the ETF to follow the changes in the Index composition during the Period.

Harvest Global Gold Giants Index ETF

RECENT DEVELOPMENTS

Potential Impact for the Fund

In the shorter-term, the macro environment (both economic and geopolitical), while appearing to stabilize, continues to have some uncertainty. Inflationary pressures have subsided and expectations that central banks will continue to cut interest rates further have been a reprieve for broader markets. Nonetheless, inflationary pressures and the potential for fewer interest rate cuts, or even the potential for interest rate increases, and expectations can change quickly based on economic data.

Uncertainty surrounding potential policy changes from the new U.S. administration, including tariffs and geopolitical trade relations, remains a source of negative sentiment and risk within the market. There is no certainty on what policy initiatives may actually be implemented by the incoming administration and this will likely continue to be a cloud overhanging broader markets through 2025.

Israel and Hamas reached an armistice that included a hostages/prisoners exchange on January 15, 2025, giving faint hope for cooling hostilities in that region to begin the year. Meanwhile, the new administration has vowed to work to end the costly war between Russia and Ukraine.

2024 Market Review

For the Period, the broader U.S. equity markets recorded above average returns of more than 20%. This came on the back of the momentum from 2023, when the broader U.S. markets performed strongly. Back-to-back returns in the broader market of over 20% annually has only occurred a few times over the past 40+ years. Despite performing strongly, the U.S. markets did see some meaningful shorter-term corrections over the course of the review Period.

For the Period, the strong performance of the equity market was not uniform across sectors nor individual stocks. Information Technology and Communication Services posted the best returns of all sectors in the first six months of the Period. Within these two leading sectors, returns were highly concentrated in a few large companies. This saw market capitalization weighted indexes being heavily influenced by above average performance in a relatively small number of mega-cap stocks, particularly those perceived as beneficiaries of investment in artificial intelligence ("AI") focused infrastructure. While select large companies were a key driver of the overall market performance during the first half, owing to their strong relative performances and sizes, the breadth of participation across stocks and sectors expanded over the course of the Period with all the 11 main sectors in the U.S. posting positive returns.

In the Fixed Income market, U.S. Treasury 10-Year Bond Yields moved modestly higher early in 2024, bouncing back from over-sold conditions coming into the end of 2023. For the review Period, the fixed income market, like the equity market, was sensitive to any new data that signaled, or failed to signal, the end of the U.S. Federal Reserve (the "Fed") restrictive monetary policy. For example, in April, new data showed that inflation was still strong. This caused long-term bond yields to move higher and the equity market to pull back. In the months that immediately followed, new data showed that inflation was subsiding. This resulted in a reversal of the pullback in both the bond and equity markets.

As additional data was unveiled through the early fall, we saw stabilization across the economic data and validation through improving corporate earnings. Further, stronger earnings guidance gave rise to improved sentiment and a rebound in equities. Most notably, there was broader market participation across the various sub-sectors and within sub-sectors. Amidst the recovery in stocks and improving economic strength, there were growing inflationary metrics that triggered concerns that the Fed may reduce the number of interest rate cuts over the coming year. This put upward pressure on longer dated interest rates during this time.

Following the U.S. election results in early November, markets continued to move higher as the election results eliminated an uncertainty that had been prevalent in the market. However, that was quickly followed by rhetoric surrounding tariffs that instilled policy concerns across the market. This caused volatility in the equity markets at the end of the Period. Given the fact that many of the proposed tariff policies would likely be inflationary, this added to further speculation that inflation pressures will be forthcoming through 2025. It also served to push longer dated bond yields higher, and changed expectations for the number of Fed's cuts in interest rates expected during 2025. This caused bond prices across durations to come under pressure during the latter part of the Period.

With economic data moderating more quickly in Canada than the U.S., the Bank of Canada ("BoC") announced an interest rate cut in June. This was the first in four years, and the first G7 country to do so this economic cycle. The BoC continued to cut its overnight lending rate for a total of seven effective 0.25% cuts during the Period.

Geopolitical tensions worsened in key regions of the globe during the Period. Specifically, ongoing wars in Eastern Europe and in the Middle East were a source of headline risks during and post the end of the Period. The ongoing geopolitical tensions during the Period did provide some support to safe-haven assets such as gold and helped to keep global oil prices trading in relatively high ranges. However, the broader markets were less sensitive to the daily headlines compared to the previous years, even though these headlines remain a source of risks for them.

RELATED PARTY TRANSACTIONS AND OTHER EXPENSES

Management fees

The Manager is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.40%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund charged daily and paid monthly. However, the Fund may invest in an underlying ETF that will pay management fees and incur operating and trading expenses. If the Fund invests in ETFs that are managed by the Manager, no management fees or incentive fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by such underlying ETFs for the same service. The underlying ETFs in which the Fund invests will pay applicable management fees, and reimburse the Fund accordingly with a Management Fee Distribution. As a result, the actual aggregate management fees indirectly payable to the Manager in respect of an investment in the Fund should be nil.

The Manager may, in its discretion, agree to charge the Fund and/or certain unitholders a reduced management fee as compared with the management fee that it otherwise would be entitled to receive, provided that the amount of the reduced management fee is distributed periodically by the Fund to the unitholder as a management fee distribution. Any reduction will depend on a number of factors, including the amount of account activity. Any tax consequences of a management fee distribution will generally be borne by the unitholder who receives the distribution.

Operating expenses
The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial services, interest, taxes, legal, audit fees, transfer agency services relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Other expenses
The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and classes of each applicable fund. These expenses were $3,015 for the Period and are included in the unitholder reporting costs on the Statement of Comprehensive Income (Loss) in the financial statements.

Waivers and absorptions
At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the Period. The Manager absorbed $124,891 of expenses of the Fund for the Period. The Manager may cease doing so at any time without notice to unitholders.

The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

Other transactions
Officers, directors and related entities of the Manager invest in units of the Fund from time to time in the normal course of business and on the same basis as arm's length investors. As at December 31, 2024 officers and directors owned 600 units of the Fund.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period.

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's annual audited financial statements.

THE FUND'S NET ASSETS PER UNIT	2024	2023	2022	2021	2020
Net assets - beginning of the period[1]	**$ 26.53**	**$ 25.51**	**$ 26.69**	**$ 31.02**	**$ 24.69**
Increase (decrease) from operations					
Total revenue	0.54	0.61	0.63	0.59	0.54
Total expenses	(0.21)	(0.19)	(0.16)	(0.20)	(0.24)
Realized gains (losses) for the period	3.82	3.28	(0.12)	0.53	2.67
Unrealized gains (losses) for the period	3.56	(2.45)	5.44	(4.98)	(0.75)
Total increase (decrease) from operations[1]	**$ 7.71**	**$ 1.25**	**$ 5.79**	**$ (4.06)**	**$ 2.22**
Distributions[2]					
From net investment income (excluding dividends)	(0.06)	(0.14)	(0.03)	(0.10)	(0.06)
From dividends	(0.38)	(0.35)	(0.20)	(0.31)	(0.13)
From capital gains	-	(1.99)	-	(0.78)	(0.65)
Total annual distributions[2]	**$ (0.44)**	**$ (2.48)**	**$ (0.23)**	**$ (1.19)**	**$ (0.84)**
Net assets - end of the period[1]	**$ 33.61**	**$ 26.53**	**$ 25.51**	**$ 26.69**	**$ 31.02**

RATIOS AND SUPPLEMENTAL DATA	2024	2023	2022	2021	2020
Total net asset value ($000's)	**$ 12,604**	**$ 14,593**	**$ 24,232**	**$ 6,005**	**$ 9,306**
Number of units outstanding (000's)	375	550	950	225	300
Management expense ratio[3]	0.68%	0.68%	0.68%	0.68%	0.68%
Management expense ratio before waivers or absorptions[3]	1.52%	1.39%	1.70%	2.66%	2.73%
Trading expense ratio[4]	0.22%	0.32%	0.34%	0.23%	0.22%
Portfolio turnover rate[5]	52.19%	79.28%	77.39%	49.61%	53.81%
Net asset value per unit	**$ 33.61**	**$ 26.53**	**$ 25.51**	**$ 26.69**	**$ 31.02**
Closing market price (HGGG)	**$ 33.61**	**$ 26.55**	**$ 25.44**	**$ 26.67**	**$ 31.65**

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.

2. Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans. Included in the above amounts is the reinvested distribution of $0.44 per unit paid to unitholders of record on December 31, 2024, $2.48 per unit paid to unitholders of record on December 29, 2023, $0.23 per unit paid to unitholders of record on December 31, 2022 and $1.19 per unit paid to unitholders of record on December 31, 2021.

3. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.

4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trading expense ratio in prior periods was not re-stated.

5. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

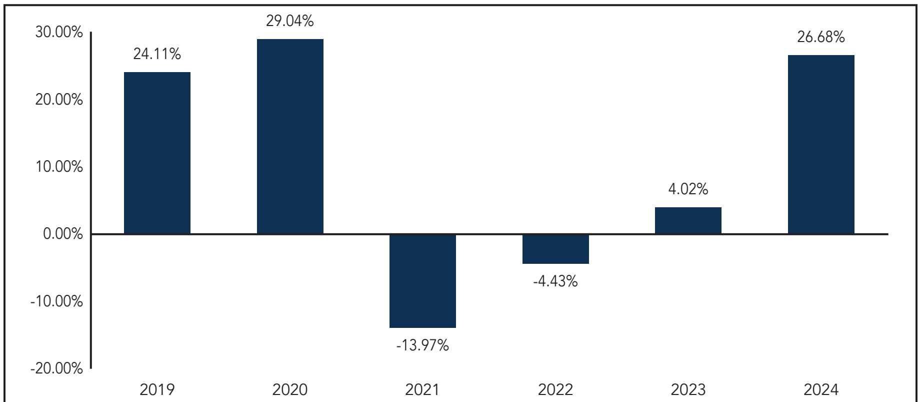
Harvest Global Gold Giants Index ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns
The following chart presents the Fund's performance for each of the years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Class A



2019 represents the period from January 10 to December 31

Annual Compound Returns
The following table shows the annual compound returns for the Fund. All returns are in Canadian dollars, unless otherwise specified, on a total return basis, net of fees.

For comparison purposes, the Solactive Global Gold Giants Index TRᵞ is used. The return of the Index is calculated without the deduction of management fees and fund expenses whereas the performance of the Fund is calculated after deducting such fees and expenses. Please see the "Results of Operations" section of this report for a discussion on recent performance.

Investment Return %	1 Year	3 Years	5 Years	10 Years	Since Inception‡
Fund Performance Class A	26.68	7.99	6.93	-	9.67
Solactive Global Gold Giants Index TRᵞ	28.48	8.99	7.96	-	10.82

‡ Since inception date is: Class A – January 10, 2019
