

Harvest Healthcare Leaders Income ETF

June 30, 2024

Interim Management Report of Fund Performance

Harvest Healthcare Leaders Income ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly or quarterly income by investing the fund portfolios in well managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Harvest Healthcare Leaders Income ETF (the "Fund"). You can get a copy of the interim financial statements at your request, and at no cost, by calling toll free at 1-866-998-8298; by writing to us at Harvest ETFs, 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund invests in equity securities of companies that are determined by the Manager of the Fund to be leaders in the healthcare sector and sells covered call options on up to 33% of its holdings with the investment objective to generate monthly cashflow for the unitholders and help lower the volatility of the Fund's overall return. In addition, the Fund provides unitholders with the opportunity to participate in capital appreciation.

To achieve its investment objective, the Fund invests with equal weighting, as a percentage of its net asset value, in 20 equity securities selected from issuers that are leaders in the healthcare sector, as determined, and reconstituted quarterly, by the Manager of the Fund, that (i) have a market capitalization of at least US\$5 billion; and (ii) have strong market for their options that trade on a recognized options exchange. The Fund is rebalanced quarterly to include securities of leaders in the healthcare sector based on the following characteristics (i) an average price-to-earnings ratio lower than the average of all the equity securities of issuers from which the Manager of the Fund makes the selection; and (ii) an average 5-year return on equity greater than the average of all the equity securities of issuers from which the Manager of the Fund makes the selection.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the six-month period ended June 30, 2024 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the MSCI World Health Care Net Total Return Index (USD)[±] for the Period is as follows:

	Return %
Class A (CAD) – hedged	7.94
Class B (CAD) – unhedged	11.79
Class U (USD) – unhedged	8.28
MSCI World Health Care Net Total Return Index (USD) [±]	7.99

The primary reason for the divergence is that the index is market-capitalization weighted, holds international positions that are priced in foreign currencies without a currency hedge, has a larger number of holdings, holds companies that do not have liquid options, does not use covered calls and is a passive index, compared to the Fund that has an active security selection and active covered call option writing processes.

The performance returns between classes of the Fund will vary as a result of the Class A hedging its exposure to the U.S. dollar back to the Canadian dollar and the Class B and Class U being unhedged units.

Factors Affecting Fund Results

For this Period, the Health Care sector posted strong positive returns, albeit they lagged the broader market. The broader market was, in part, heavily skewed by strong performance mainly towards Technology, Communications and select Consumer Discretionary stocks.

Within the Fund, individual stocks did not perform uniformly, due to certain stock specific catalysts that drove their relative performance. The difference between the top and bottom performers was very wide within sub-sectors and among individual stocks. For example, both the top performing stock and the bottom performing stock in the Fund were once again from the pharmaceutical sectors. There were no material changes to the sub-sector allocations for the Fund during the Period outside of market movements and rebalancing.

Across the Health Care sector, clinical trial results for diabetes and weight loss treatments highlighted the potential for a very large market and benefitted the top performing position in the Fund, Eli Lilly and Company, a market leader in this therapeutic area. In addition, several of the medical equipment manufacturers benefited from the momentum behind the positive sentiment that commenced in the fourth quarter of 2023. That resulted in several of the Fund's holdings being amongst the best performing stocks during the Period.

Harvest Healthcare Leaders Income ETF

On the other hand, Bristol-Myers Squibb Company saw increased competition coupled with concerns surrounding loss of exclusivity in certain drugs later in the decade. Zoetis Inc., one of the world's largest animal health companies, had concerns surrounding a weakening consumer and its impact on companion animal spending coupled with some concerns surrounding new product launches.

The varied underlying performance and key stock catalysts highlight the benefits of diversification while still being somewhat concentrated in an actively managed portfolio of 20 large capitalization stocks. The Fund remains diversified across Health Care Equipment & Supplies, Pharmaceuticals, Life Sciences Tools & Services, Biotechnology, and Health Care Providers & Services.

The Fund sold call options on the underlying holdings during the Period to meet its investment objectives.

RECENT DEVELOPMENTS

Potential Impact for the Fund

In the shorter-term, the macro environment (both economic and geopolitical), while appearing to stabilize, continues to have some uncertainty. Inflationary pressures have subsided and expectations that central banks will not increase rates further have been a reprieve for broader markets. Nonetheless, inflationary pressures and potential for interest rate increases can change quickly based on economic data.

Global geopolitical tensions remain elevated, although the markets and the Health Care sector seemed to be less sensitive to the geopolitical headlines this Period relative to previous periods. Notwithstanding, as the conflicts in Eastern Europe and the Middle East prolong, there remain potential threats to the world economies and the stock markets.

Regardless of the shorter-term macro environment, the primary long-term drivers for the Health Care sector over the medium-longer term remain intact: global aging populations, developing markets, and technological innovation (both across devices and bio/pharmaceutical drugs). These medium- to longer-term drivers form the basis of our positive view on the sector. It is also well positioned to withstand some of the shorter-term macro uncertainty that may persist and remains positioned to participate in the upside recovery as the breadth of participation continues to expand across the broader markets.

Mid-Year Market Review

For the Period, the broader U.S. equity markets recorded above average returns. This came on back of the momentum from 2023, when the U.S. markets also returned above average performance. This was partly aided by the new tone from the Federal Reserve in the United States (the "Fed") in the fall of 2023, suggesting that a pause in the interest rates hiking was warranted. In addition, the U.S. markets saw a few meaningful corrections in the review Period, unlike the significant market volatility of 2022 and 2023 that was the result of several global events.

During the Period, the above average performance of the equity market was not uniform across sub-sectors nor individual stocks. The leadership role of technology companies and communications companies was once again re-enforced with both posting the best returns out of all sub-sectors for the Period. Even within these sub-sectors, returns were highly concentrated in a few large companies. This was borne out in market capitalization weighted indexes that were heavily influenced by above average performance in a relatively small number of mega-cap stocks, particularly those perceived as beneficiaries of investment on artificial intelligence ("AI") focused infrastructure. While select large companies were a key driver of the overall market performance, given their relatively very strong performance and their sizes, the breadth of participation across stocks and sub-sectors expanded over the course of the Period with 10 out of the 11 main sub-sectors in the U.S. all posting positive returns. Bond prices stabilized following the uptick in rates in April. However, longer dated bond yields remained highly sensitive to daily economic data sets as the Fed transitions from a hiking to easing environment and the market tries to pinpoint more accurately as to when it will eventually start to cut interest rates.

In the Fixed Income market, U.S. Treasury 10-Year Bond Yields moved modestly higher early in the year, seemingly bouncing from over-sold conditions coming into the end of 2023. During April, there were some concerns that the inflationary economic indicators were not subsiding sufficiently to warrant the Fed to pause on raising interest rates. This caused a shorter-term pull-back in both equity and bond prices as longer dated bond yields moved higher. However, for both bonds and equities, the pullback was short lived and prices started to recover as economic data that followed over the course of the following month suggested inflation is subsiding.

In Canada, the broader equity markets posted positive returns for the Period. In part due to the economic growth disparities and structural differences between the two markets, the Canadian equity markets lagged those of the U.S. and within the Canadian market's sub-sectors, just over half ended the Period with positive returns. With economic data moderating more quickly in Canada than the U.S., the Bank of Canada announced an interest rate cut in June, the first in four years and the first G7 country to do so this economic cycle.

Global geopolitical tensions remained elevated during the Period and provided some support to safe-haven assets such as gold and helped to keep global oil prices above where they closed in 2023. However, the markets were less sensitive to these geopolitical headlines (i.e. the wars in the Middle East and Europe, and tensions between U.S. and China) compared to previous years.

Other

On June 25, 2024, the Manager announced an increase to the monthly distribution amount from \$0.0583 per unit per month to \$0.0600 per unit per month commencing with distributions declared in July 2024. This change impacted all Classes of units of the Fund.

RELATED PARTY TRANSACTIONS AND OTHER EXPENSES

Management fees

The Manager is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.85%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund charged daily and paid monthly.

The Manager may, in its discretion, agree to charge the Fund and/or certain unitholders a reduced management fee as compared with the management fee that it otherwise would be entitled to receive, provided that the amount of the reduced management fee is distributed periodically by the Fund to the unitholder as a management fee distribution. Any reduction will depend on a number of factors, including the amount of account activity. Any tax consequences of a management fee distribution will generally be borne by the unitholder who receives the distribution.

Harvest Healthcare Leaders Income ETF

The Manager has agreed to charge a reduced management fee to certain unitholders in the form of a management fee distribution. The Fund paid \$99,923 of management fee distributions during the Period.

Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial services, interest, taxes, legal, audit fees, transfer agency services relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and classes of each applicable fund. These expenses were \$152,368 for the Period and are included in the unitholder reporting costs on the Statement of Comprehensive Income (Loss) in the financial statements.

Waivers and absorptions

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the Period. The Manager absorbed \$179,401 of expenses of the Fund for the Period. The Manager may cease doing so at any time without notice to unitholders.

Other transactions

Officers, directors and related entities of the Manager invest in units of the Fund from time to time in the normal course of business and on the same basis as arm's length investors. As at June 30, 2024 officers and directors owned 8,860 units of the Fund.

The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period.

Harvest Healthcare Leaders Income ETF

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's interim financial statements and past annual audited financial statements.

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Class B commenced operations on March 10, 2020 with a net asset value per unit of \$8.00.
- Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period. In 2020 the calculation was modified to include certain transaction costs charged by the custodian. The trading expense ratio in prior periods was not re-stated.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Healthcare Leaders Income ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following charts present the Fund's performance for each of the years shown and illustrate how the Fund's performance varied for Class A, Class B, and Class U. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year except for 2024 which represents the Period.

The logo features a large, stylized white 'H' in a script font. To its right, the word 'ARVEST' is written in a white, all-caps serif font. Below 'ARVEST', the letters 'ETFs' are written in a smaller, white, all-caps sans-serif font. A thin white horizontal line is positioned below the 'ARVEST' and 'ETFs' text.
