Harvest Global Gold Giants Index ETF

CEO'S MESSAGE

Unitholder Letter March 2026

Dear Valued Investor,

Thank you for your continued trust in Harvest ETFs throughout 2025. Our investment approach, which is centered on owning industry-leading businesses and long-term secular themes, remains the foundation of our ETFs and investment strategies.

The past year proved to be an eventful one for both Harvest and global markets. Early in the year, the introduction of tariffs unsettled investors and created heightened volatility. However, market anxieties eased after the U.S. administration softened its stance following its initial rollout on "Liberation Day" in April. At the same time, the artificial intelligence (AI) revolution continued to dominate the investment landscape, with technology leaders committing significant capital to expand AI data centres and advance next-generation AI capabilities.

Despite a rocky start, equity markets finished 2025 at record highs. The sharp 20% correction experienced in March and April is now firmly in the rear-view mirror, underscoring the resilience of markets over the full year.

Bitcoin, the world's largest digital currency, reached an all-time high of just over \$126,000 USD in October 2025. While the cryptocurrency market experienced a pullback toward year-end, Bitcoin ultimately finished the year with a 6% decline.

As an equity-focused investment manager, Harvest experienced both the highs and lows of market volatility throughout the year. Nevertheless, many of our mandates delivered a strong performance. The Harvest Global Gold Giants ETF (TSX: HGGG) led the lineup, rising 168.18% for the year. Canadian equities also performed well despite tariff-related uncertainty, supporting strong gains for the Harvest Canadian Equity Income Leaders ETF (TSX: HLIF), which advanced 25.68% in 2025.

Canada's largest income-producing healthcare ETF, the Harvest Healthcare Leaders Income ETF (TSX: HHL), gained 10.57% for the year. Its levered counterpart, the Harvest Healthcare Leaders Enhanced Income ETF (TSX: HHLE), rose 11.68%, navigating significant headwinds within the U.S. healthcare sector.

Harvest continued to expand its Harvest High Income Shares™ ETF suite, originally launched in 2024. Throughout 2025, we added new single-stock ETFs and introduced the Harvest Diversified High Income Shares ETF (TSX: HHIS), a multi-sector portfolio of Harvest single-stock ETFs. TD (Source: CETFA. TD Securities ETF Strategy, Canadian ETF Weekly, January 6, 2026) reports that HHIS was the number one ETF for inflows in the single stock ETF space in 2025. HHIS surpassed \$1.2 billion in assets under management during the year. In August, we also launched the Harvest Canadian High Income Shares ETF (TSX: HHIC), providing diversified exposure to Canada's largest and most actively traded companies.

In fixed income markets, long-duration U.S. interest rates remained elevated as inflation concerns persisted. This continued to pressure HPYT, our longer-duration fixed income ETF.

Today, Harvest manages over \$10 billion in assets for Canadian investors across 66 ETF strategies. Our product lineup remains anchored in long-term equity mandates designed to deliver consistent monthly income. Since inception, Harvest ETFs has distributed more than \$2.3 billion to unitholders. For over 16 years, we have built a strong track record of quality, innovation, and award-winning investment solutions for Canadians.

Looking ahead to 2026, we remain committed to our investment philosophy of identifying long-term growth industries and enduring mega-trends. Our outlook continues to be guided by a focus on high-quality businesses and powerful forces that we believe will drive value over time.

Thank you for your continued confidence in the Harvest ETFs team and our investment solutions. We remain dedicated to disciplined portfolio management and the ongoing development of innovative, income-focused products in the years ahead.

Sincerely,

Signed "Michael Kovacs"

Michael Kovacs,

Chief Executive Officer

Harvest Global Gold Giants Index ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Harvest Global Gold Giants Index ETF (the "Fund"). You can get a copy of the annual financial statements at your request, and at no cost, by calling toll free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Solactive Global Gold Giants Index TR^Y (the "Index"). The Fund primarily invests in large gold mining issuers that are listed on a regulated stock exchange in North America, Australia or in certain European countries.

To achieve its investment objective, the Fund will invest directly or indirectly in the constituents of Solactive Global Gold Giants Index TR^Y to replicate the performance of the Index. The Index intends to track the price movements of the 20 largest gold mining companies, measured by market capitalization, that are listed on a regulated stock exchange in North America, Australia or in certain European countries. Based on market condition the Fund may invest a substantial portion of its assets in cash and cash equivalents.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the year ended December 31, 2025 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the Solactive Global Gold Giants Index TR^Y for the Period is as follows:

	Return %
Class A	168.18
Solactive Global Gold Giants Index TR ^Y	173.92

The Fund tracks the index which provides investors with a cost-effective vehicle to access the world's largest gold companies listed on stock exchanges in select developed markets. The Fund was invested in the 20 largest global gold companies by market cap on an equal-weighted basis at the end of the Period and are mainly headquartered in Canada, Australia, the United Kingdom, and the U.S.

Factors Affecting Fund Results

Every name in the portfolio had very strong positive returns during the Period. The top three contributors to performance were Lundin Gold Inc., AngloGold Ashanti PLC, and OceanaGold Corporation. Even the bottom performers saw total returns that were multiple times higher than broader stock market indices. Similar to 2024, gold prices essentially rose throughout the Period to reach all time highs. Central banks' hoarding of gold along with gold's safe-haven to investors contributed to the rise in prices and helped to propel the Fund to a standout performer in the Period.

The Period was marked by stickier inflation, a potential for weakening economic data, and unpredictable global trade policy under the Trump administration. By the Fall, the U.S. also had to contend with a government shutdown, that resulted in missing economic data and made it difficult to understand how things were really progressing. Not only did gold benefit from these stagflation concerns and political risks, but there was a heightened environment of multiple global conflicts that also kept market participants worried about geopolitical risks, and that has also tended to push investors to seek the safe-haven of hard assets, like gold. Late year concerns around the situation in Venezuela kept markets on edge.

The Fund posted record highs that also materially outperformed gold prices, given the nature of the operating leverage in mining businesses, which also saw margins assisted by gold prices rising more than operating costs.

The Fund underwent a few changes during the Period to match the Index. Centamin PLC was acquired by AngloGold Ashanti PLC and DE Gray Mining Limited was acquired by Northern Star Resources Limited, resulting in Artemis Gold Inc. and G Mining Ventures Corp. replacing those names in the Fund, respectively.

RECENT DEVELOPMENTS

Potential Impact for the Fund

The rapidly evolving U.S. trade policy, particularly concerning tariffs was a significant animating force of uncertainty and volatility during the Period. The announcement of ultra-high reciprocal tariffs by the U.S. in early April caused a sharp market reaction, highlighting the sensitivity of global markets to trade protectionism. Despite the pullbacks in some of the proposed tariff initiatives they have not fully gone away.

Harvest Global Gold Giants Index ETF

Ongoing conflicts in Eastern Europe and the Middle East continued to be a source of headline risks. These tensions provided some support to safe-haven assets like gold but have contributed to high volatility in global oil prices.

Overall, the broader markets have been resilient, becoming less sensitive to daily headlines compared to previous years. However, the impacts of the above macro uncertainties on the broader markets remain sources of unpredictability going forward.

2025 Market Review

For the Period, global financial markets continued to navigate a complex landscape characterized by evolving monetary policy, persistent geopolitical tensions, and shifting trade dynamics. After a strong start to the Period, global markets were shaken by uncertainty surrounding the introduction of new trade policies by the U.S. administration leading to escalating rounds of tariffs. As a result, the markets experienced significant volatility during March and April. To the markets' relief, the most draconian scenarios were avoided, and although geopolitical and trade uncertainty remained a cloud over markets for much of the year, investors quickly pivoted their attention back to a resilient economic environment.

In the U.S., large-cap equity markets recorded a third consecutive year of double-digit gains, ending the year near all-time highs. This came amid a mix of challenges and bright spots. Following a brief but sharp decline as tariff headlines rattled markets, equities bottomed in early April and embarked on a rally that carried through year-end. The passage of the "One Big Beautiful Bill Act" was a welcomed positive catalyst for markets. The inclusion in the "One Big Beautiful Bill Act" of several tax reduction initiatives is widely believed to bolster consumer spending and business investment through 2026. During the 4th quarter of the year, the U.S. government experienced a temporary shutdown as politicians grappled over the expiration of Affordable Care Act premium tax credits that were expanded during the Covid-19 pandemic. While the related appropriations bills were ultimately passed without an extension of the credits, markets experienced modest volatility during this period, in part due to concerns around the economic impact of the shutdown but also due to a dearth of government-provided economic data releases.

Investment in AI infrastructure remained the dominant theme for markets with technology-related sectors. Technology and related sectors ended the Period with the highest returns, with broad market participation as all sectors ended the year in positive territory. As the rally in semiconductor stocks further matured, investors turned to derivative plays on the AI theme, including utilities and select industrials.

Financial stocks also performed well during the Period and benefited from the anticipated actions of the Federal Reserve to cut rates. In anticipation of the Fed's action the U.S. Treasury yield curve steepened significantly throughout the Period - longer-term interest rates rise faster than shorter term interest rates. A steepening yield curve is typically positive for bank profit margins, while capital markets-related businesses among the mega-cap universal banks and brokers were also strong through the Period. The Fed eventually resumed interest rate cuts in September following a pause that extended from December of 2024.

The Real Estate Investment Trust sector recorded the smallest gain during the year, with many constituents hampered by headwinds in the multifamily and office sub-industries. Notwithstanding, long-term treasury yields remained elevated offering investors a lower risk alternative to the group. The Consumer Staples sector also lagged the broader market as tariff concerns weighed on profitability expectations. For most of the year investors gravitated towards high growth themes, which generally does not include Consumer Staples.

U.S. Treasury markets were volatile through the first half of the Period amid trade uncertainty and geopolitical tensions that roiled markets. Over the course of the year, the yield curve steepened as investors first anticipated and then, beginning in September, saw a resumption in the interest rate cutting cycle from the Federal Reserve. Despite the fall in rates at the short end of the curve, interest rates at the long end remained elevated, closing the year roughly flat for terms of 20 years and beyond. Long-term U.S. Treasury yields remained elevated, and many major economies saw a continuation of the upward trends in long-term rates. This was surprising amid the elevated global uncertainty, which typically drives demand for Treasuries from investors seeking safe havens and result in lower yields.

Canada faced several challenges during the year, including trade uncertainty, labour market volatility as well as an unscheduled change in leadership. Moderating GDP growth through most of the year and stable inflation readings near the central bank's target rate provided the impetus for the Bank of Canada to continue cutting interest rates, which totaled 100 basis points by the end of the Period.

Despite the challenges faced, the Canadian equity market posted strong gains for the year, significantly outperforming U.S. equities. Although returns in the Materials sector led most other areas of the market by a wide margin, participation was broad, with all 11 sectors ending the year in positive territory. Strong advances in the prices of gold, silver, and copper provided a key catalyst for miners.

Solid performance from the key Financials and Energy sectors also contributed significantly to the strong market returns. Bank stocks benefitted from supportive monetary policy from the Bank of Canada, strong capital markets segment performance and resilient credit quality.

RELATED PARTY TRANSACTIONS AND OTHER EXPENSES

Management fees

The Manager is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.40%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund charged daily and paid monthly.

The Manager may, in its discretion, agree to charge the Fund and/or certain unitholders a reduced management fee as compared with the management fee that it otherwise would be entitled to receive, provided that the amount of the reduced management fee is distributed periodically by the Fund to the unitholder as a management fee distribution. Any reduction will depend on a number of factors, including the amount of account activity. Any tax consequences of a management fee distribution will generally be borne by the unitholder who receives the distribution.

Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial fees, interest, taxes, legal, audit fees, transfer agency fees relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Harvest Global Gold Giants Index ETF

Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and classes of each applicable fund. These expenses were \$4,093 for the Period and are included in the unitholder reporting costs on the Statement of Comprehensive Income (Loss) in the financial statements.

Waivers and absorptions

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the Period. The Manager absorbed \$104,764 of expenses of the Fund for the Period. The Manager may cease doing so at any time without notice to unitholders.

The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

Other transactions

Officers, directors and related entities of the Manager invest in units of the Fund from time to time in the normal course of business and on the same basis as arm's length investors. As at December 31, 2025 officers and directors owned 600 units of the Fund.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period.

Harvest Global Gold Giants Index ETF

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's annual audited financial statements.

THE FUND'S NET ASSETS PER UNIT	2025	2024	2023	2022	2021
Net assets - beginning of the period	\$ 33.61	\$ 26.53	\$ 25.51	\$ 26.69	\$ 31.02
Increase (decrease) from operations					
Total revenue	0.87	0.54	0.61	0.63	0.59
Total expenses	(0.42)	(0.21)	(0.19)	(0.16)	(0.20)
Realized gains (losses) for the period	12.41	3.82	3.28	(0.12)	0.53
Unrealized gains (losses) for the period	44.90	3.56	(2.45)	5.44	(4.98)
Total increase (decrease) from operations¹	\$ 57.76	\$ 7.71	\$ 1.25	\$ 5.79	\$ (4.06)
Distributions²					
From net investment income (excluding dividends)	(0.07)	(0.06)	(0.14)	(0.03)	(0.10)
From dividends	(0.32)	(0.38)	(0.35)	(0.20)	(0.31)
From capital gains	(5.07)	-	(1.99)	-	(0.78)
Total annual distributions²	\$ (5.46)	\$ (0.44)	\$ (2.48)	\$ (0.23)	\$ (1.19)
Net assets - end of the period¹	\$ 90.14	\$ 33.61	\$ 26.53	\$ 25.51	\$ 26.69

RATIOS AND SUPPLEMENTAL DATA	2025	2024	2023	2022	2021
Total net asset value (000's)	\$ 56,340	\$ 12,604	\$ 14,593	\$ 24,232	\$ 6,005
Number of units outstanding (000's)	625	375	550	950	225
Management expense ratio ³	0.68%	0.68%	0.68%	0.68%	0.68%

Closing Market Price (HGGG)	\$ 90.38	\$ 33.61	\$ 26.55	\$ 25.44	\$ 26.67

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans. Included in the above amounts is the reinvested distribution of \$5.46 per unit paid to unitholders of record on December 31, 2025, \$0.44 per unit paid to unitholders of record on December 31, 2024, \$2.48 per unit paid to unitholders of record on December 29, 2023, \$0.23 per unit paid to unitholders of record on December 31, 2022 and \$1.19 per unit paid to unitholders of record on December 31, 2021.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Global Gold Giants Index ETF

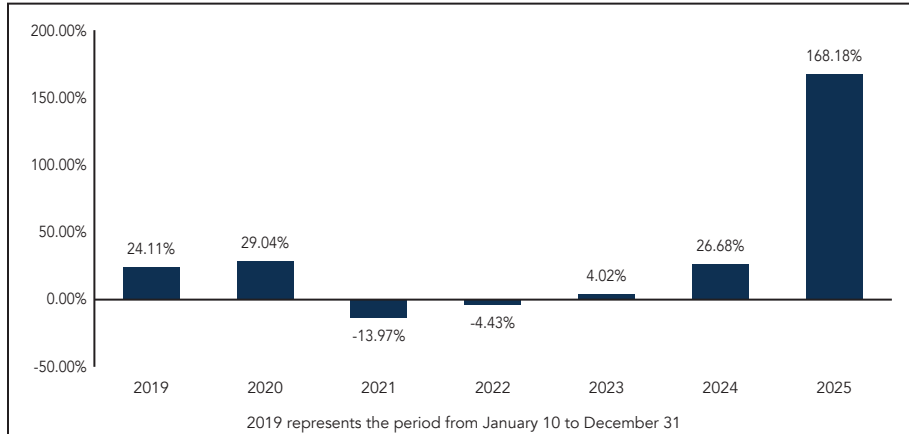

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following chart presents the Fund's performance for each of the years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Class A

Annual Compound Returns

The following table shows the annual compound returns for the Fund. All returns are in Canadian dollars, unless otherwise specified, on a total return basis, net of fees.

For comparison purposes, the Solactive Global Gold Giants Index TR^Y is used. The return of this benchmark is calculated without the deduction of management fees and fund expenses whereas the performance of the Fund is calculated after deducting such fees and expenses. Please see the "Results of Operations" section of this report for a discussion on recent performance.

Investment Return %	1 Year	3 Years	5 Years	10 Years	Since Inception [‡]
Fund Performance Class A	168.18	52.32	23.78	-	24.67
Solactive Global Gold Giants Index TR ^Y	173.92	54.66	25.28	-	26.17

[‡] Since inception date is: Class A – January 10, 2019
