Management Report of Fund Performance

December 31, 2025

Harvest Tech Achievers Growth & Income ETF

CEO'S MESSAGE

Unitholder Letter March 2026

Dear Valued Investor,

Thank you for your continued trust in Harvest ETFs throughout 2025. Our investment approach, which is centered on owning industry-leading businesses and long-term secular themes, remains the foundation of our ETFs and investment strategies.

The past year proved to be an eventful one for both Harvest and global markets. Early in the year, the introduction of tariffs unsettled investors and created heightened volatility. However, market anxieties eased after the U.S. administration softened its stance following its initial rollout on "Liberation Day" in April. At the same time, the artificial intelligence (AI) revolution continued to dominate the investment landscape, with technology leaders committing significant capital to expand AI data centres and advance next-generation AI capabilities.

Despite a rocky start, equity markets finished 2025 at record highs. The sharp 20% correction experienced in March and April is now firmly in the rear-view mirror, underscoring the resilience of markets over the full year.

Bitcoin, the world's largest digital currency, reached an all-time high of just over \$126,000 USD in October 2025. While the cryptocurrency market experienced a pullback toward year-end, Bitcoin ultimately finished the year with a 6% decline.

As an equity-focused investment manager, Harvest experienced both the highs and lows of market volatility throughout the year. Nevertheless, many of our mandates delivered a strong performance. The Harvest Global Gold Giants ETF (TSX: HGGG) led the lineup, rising 168.18% for the year. Canadian equities also performed well despite tariff-related uncertainty, supporting strong gains for the Harvest Canadian Equity Income Leaders ETF (TSX: HLIF), which advanced 25.68% in 2025.

Canada's largest income-producing healthcare ETF, the Harvest Healthcare Leaders Income ETF (TSX: HHL), gained 10.57% for the year. Its levered counterpart, the Harvest Healthcare Leaders Enhanced Income ETF (TSX: HHLE), rose 11.68%, navigating significant headwinds within the U.S. healthcare sector.

Harvest continued to expand its Harvest High Income Shares™ ETF suite, originally launched in 2024. Throughout 2025, we added new single-stock ETFs and introduced the Harvest Diversified High Income Shares ETF (TSX: HHIS), a multi-sector portfolio of Harvest single-stock ETFs. TD (Source: CETFA. TD Securities ETF Strategy, Canadian ETF Weekly, January 6, 2026) reports that HHIS was the number one ETF for inflows in the single stock ETF space in 2025. HHIS surpassed \$1.2 billion in assets under management during the year. In August, we also launched the Harvest Canadian High Income Shares ETF (TSX: HHIC), providing diversified exposure to Canada's largest and most actively traded companies.

In fixed income markets, long-duration U.S. interest rates remained elevated as inflation concerns persisted. This continued to pressure HPYT, our longer-duration fixed income ETF.

Today, Harvest manages over \$10 billion in assets for Canadian investors across 66 ETF strategies. Our product lineup remains anchored in long-term equity mandates designed to deliver consistent monthly income. Since inception, Harvest ETFs has distributed more than \$2.3 billion to unitholders. For over 16 years, we have built a strong track record of quality, innovation, and award-winning investment solutions for Canadians.

Looking ahead to 2026, we remain committed to our investment philosophy of identifying long-term growth industries and enduring mega-trends. Our outlook continues to be guided by a focus on high-quality businesses and powerful forces that we believe will drive value over time.

Thank you for your continued confidence in the Harvest ETFs team and our investment solutions. We remain dedicated to disciplined portfolio management and the ongoing development of innovative, income-focused products in the years ahead.

Sincerely,

Signed "Michael Kovacs"

Michael Kovacs,

Chief Executive Officer

Harvest Tech Achievers Growth & Income ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the Harvest Tech Achievers Growth & Income ETF (the "Fund"). You can get a copy of the annual financial statements at your request, and at no cost, by calling toll free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund invests in equity securities of companies that are in the technology sector, which the Manager of the Fund determined to be technology achievers, and sells covered call options on up to 33% of its holdings with an investment objective to generate monthly cash flows for the unitholders and help lower the volatility of the Fund's overall return. In addition, the Fund provides unitholders with the opportunity to participate in capital appreciation.

To achieve its investment objective, the Fund will invest, with equal weighting as a percentage of its net asset value, in 20 equity securities of technology issuers where each issuer has market capitalization of at least US\$10 billion and have a strong exchange traded options market. The Fund is rebalanced and reconstituted quarterly based on (i) an average current year forward price-to-earnings ratio that is less than the average for all issuers from which the Manager of the Fund makes the selection; (ii) an average 3-year return on equity greater than the average for all issuers from which the Manager of the Fund makes the selection; and (iii) an average price/earning to growth ratio that is less than the average for the all issuers from which the Manager of the Fund makes the selection.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the year ended December 31, 2025 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return by Class compared to the Solactive US Large & Mid Cap Technology Index NTR (USD)^y for the Period is as follows:

	Return %
Class A (CAD) – hedged	12.38
Class B (CAD) – unhedged	9.54
Class U (USD) – unhedged	14.73
Solactive US Large & Mid Cap Technology Index NTR (USD) ^y	24.45

The primary reason for the divergence is that the index is market-capitalization weighted, holds positions that do not meet the size / liquidity criteria of the Fund, has a larger number of holdings, holds companies that do not have liquid options, and does not use covered calls, compared to the Fund that has an active security selection and active covered call option writing processes.

The performance returns between classes of the Fund will vary as a result of the Class A hedging its exposure to the U.S. dollar back to the Canadian dollar and the Class B and Class U being unhedged units.

Factors Affecting Fund Results

Among the Fund's strongest performers in the Period were semiconductor manufacturers Micron Technology, Inc. and Broadcom Inc. Communications equipment provider Arista Networks, Inc. and Google parent Alphabet Inc. also performed strongly.

Detractors from performance included Salesforce, Inc. and Adobe Inc. as investors questioned both companies' abilities to monetize artificial intelligence ("AI") features within their platforms while facing emerging competitive threats. Shares of Accenture PLC also declined, as investors contemplated the potentially negative impact on operational results from AI-driven productivity improvements, which could lead to declines in business activity for IT service providers.

The Information Technology sector experienced significant volatility to start the Period, underperforming the broader market from January until the market lows in early April. In addition to the broader economic worries driven by tariff uncertainty that impacted markets generally, investor concerns regarding a slowdown in spending on AI infrastructure began to emerge, driven by the release of a new version of a generative AI model developed in China called DeepSeek, with claims of comparable or superior performance to Western-based models but with significantly lower development costs. These concerns were exacerbated by questions about the potential return on investment given the massive level of capital expenditure.

Harvest Tech Achievers Growth & Income ETF

Following the delay of the so-called "Liberation Day" reciprocal tariffs by the U.S., technology stocks rallied along with the broader market. Excitement in the AI theme was reinvigorated as many of the so-called "hyperscaler" companies such as Microsoft Corporation, Alphabet Inc. and Amazon.com, Inc., increased their guidance for capital expenditures throughout the year. The rally in technology stocks was largely characterized by strong returns to semiconductor stocks, which have thus far been the primary beneficiaries of AI spending, however the rally did broaden somewhat to include select communication equipment providers and other hardware-focused companies. Many stocks in the software industry struggled through the Period, with investor questions around ability to monetize premium AI features effectively and competitive concerns for incumbent players took center stage. The AI theme took another pause late in the period as investors once again grew leery of the high levels of spending, exacerbated by some major companies, most notably Oracle Corp., resorting to debt issuance to finance capacity expansion.

Performance in the sector was also marked by continued trade tensions between the U.S. and China. In response to reciprocal tariffs imposed by both countries on each other, China temporarily banned the export of certain rare-earth minerals to the U.S., while the U.S. temporarily blocked the sale of electronic design automation software, products used in the design of semiconductors, to China. While both measures were eventually reversed, these actions demonstrated that the technology sector remains a key area of competition for the two countries and highlights a significant risk that continues to hang over the sector.

The Fund continued to write call options against its equity positions in accordance with its investment mandate.

RECENT DEVELOPMENTS

Potential Impact for the Fund

Looking forward, companies are broadly expected to experience another year of solid earnings growth aided by stimulative provisions within the "One Big Beautiful Bill Act" as well as interest rate cuts by the U.S. Federal Reserve. Investor concerns surrounding the usage of debt to finance higher levels of spending on AI infrastructure and the ultimate return on those spending initiatives is likely to persist, companies continue to expand their capital expenditure commitments. As applications continue to expand and productivity improvements from AI solutions become more widely demonstrated the sources of spending on these technologies is also likely to broaden further, including among enterprises as well as among governments. A major source of uncertainty and volatility during the Period was the rapidly evolving U.S. trade policy, particularly concerning tariffs. While tensions between the U.S. and China have eased somewhat in recent months, relations remain precarious.

In recent months, the U.S. Federal Reserve has adopted a more dovish stance towards monetary policy as broader inflationary pressures moderated while employment data softened. Should inflationary pressures intensify on a reacceleration in economic activity, the Federal Reserve could adopt less accommodative policy measures which may have a negative impact on the performance of growth sectors like Technology.

2025 Market Review

For the Period, global financial markets continued to navigate a complex landscape characterized by evolving monetary policy, persistent geopolitical tensions, and shifting trade dynamics. After a strong start to the Period, global markets were shaken by uncertainty surrounding the introduction of new trade policies by the U.S. administration leading to escalating rounds of tariffs. As a result, the markets experienced significant volatility during March and April. To the markets' relief, the most draconian scenarios were avoided, and although geopolitical and trade uncertainty remained a cloud over markets for much of the year, investors quickly pivoted their attention back to a resilient economic environment.

In the U.S., large-cap equity markets recorded a third consecutive year of double-digit gains, ending the year near all-time highs. This came amid a mix of challenges and bright spots. Following a brief but sharp decline as tariff headlines rattled markets, equities bottomed in early April and embarked on a rally that carried through year-end. The passage of the "One Big Beautiful Bill Act" was a welcomed positive catalyst for markets. The inclusion in the "One Big Beautiful Bill Act" of several tax reduction initiatives is widely believed to bolster consumer spending and business investment through 2026. During the 4th quarter of the year, the U.S. government experienced a temporary shutdown as politicians grappled over the expiration of Affordable Care Act premium tax credits that were expanded during the Covid-19 pandemic. While the related appropriations bills were ultimately passed without an extension of the credits, markets experienced modest volatility during this period, in part due to concerns around the economic impact of the shutdown but also due to a dearth of government-provided economic data releases.

Investment in AI infrastructure remained the dominant theme for markets with technology-related sectors. Technology and related sectors ended the Period with the highest returns, with broad market participation as all sectors ended the year in positive territory. As the rally in semiconductor stocks further matured, investors turned to derivative plays on the AI theme, including utilities and select industrials.

Financial stocks also performed well during the Period and benefited from the anticipated actions of the Federal Reserve to cut rates. In anticipation of the Fed's action the U.S. Treasury yield curve steepened significantly throughout the Period - longer-term interest rates rise faster than shorter term interest rates. A steepening yield curve is typically positive for bank profit margins, while capital markets-related businesses among the mega-cap universal banks and brokers were also strong through the Period. The Fed eventually resumed interest rate cuts in September following a pause that extended from December of 2024.

The Real Estate Investment Trust sector recorded the smallest gain during the year, with many constituents hampered by headwinds in the multifamily and office sub-industries. Notwithstanding, long-term treasury yields remained elevated offering investors a lower risk alternative to the group. The Consumer Staples sector also lagged the broader market as tariff concerns weighed on profitability expectations. For most of the year investors gravitated towards high growth themes, which generally does not include Consumer Staples.

U.S. Treasury markets were volatile through the first half of the Period amid trade uncertainty and geopolitical tensions that roiled markets. Over the course of the year, the yield curve steepened as investors first anticipated and then, beginning in September, saw a resumption in the interest rate cutting cycle from the Federal Reserve. Despite the fall in rates at the short end of the curve, interest rates at the long end remained elevated, closing the year roughly flat for terms of 20 years and beyond. Long-term U.S. Treasury yields remained elevated, and many major economies saw a continuation of the upward trends in long-term rates. This was surprising amid the elevated global uncertainty, which typically drives demand for Treasuries from investors seeking safe havens and result in lower yields.

Canada faced several challenges during the year, including trade uncertainty, labour market volatility as well as an unscheduled change in leadership. Moderating GDP growth through most of the year and stable inflation readings near the central bank's target rate provided the impetus for the Bank of Canada to continue cutting interest rates, which totaled 100 basis points by the end of the Period.

Harvest Tech Achievers Growth & Income ETF

Despite the challenges faced, the Canadian equity market posted strong gains for the year, significantly outperforming U.S. equities. Although returns in the Materials sector led most other areas of the market by a wide margin, participation was broad, with all 11 sectors ending the year in positive territory. Strong advances in the prices of gold, silver, and copper provided a key catalyst for miners.

Solid performance from the key Financials and Energy sectors also contributed significantly to the strong market returns. Bank stocks benefitted from supportive monetary policy from the Bank of Canada, strong capital markets segment performance and resilient credit quality.

RELATED PARTY TRANSACTIONS AND OTHER EXPENSES

Management fees

The Manager is responsible for managing the Fund's overall business and operations and provides key management personnel to the Fund. The Fund pays the Manager an annual management fee of 0.85%, plus applicable taxes, based on a percentage of the average daily net asset value ("NAV") of the Fund charged daily and paid monthly. However, the Fund may invest in an underlying ETF that will pay management fees and incur operating and trading expenses. If the Fund invests in ETFs that are managed by the Manager, no management fees or incentive fees are payable by the Fund that, to a reasonable person, would duplicate a fee payable by such underlying ETFs for the same service. The underlying ETFs in which the Fund invests will pay applicable management fees, and reimburse the Fund accordingly with a Management Fee Distribution.

The Manager may, in its discretion, agree to charge the Fund and/or certain unitholders a reduced management fee as compared with the management fee that it otherwise would be entitled to receive, provided that the amount of the reduced management fee is distributed periodically by the Fund to the unitholder as a management fee distribution. Any reduction will depend on a number of factors, including the amount of account activity. Any tax consequences of a management fee distribution will generally be borne by the unitholder who receives the distribution.

The Manager has agreed to charge a reduced management fee to certain unitholders in the form of a management fee distribution. The Fund paid \$0 of management fee distributions during the Period.

Operating expenses

The Fund is responsible for operating expenses relating to the carrying on of its business, including custodial fees, interest, taxes, legal, audit fees, transfer agency fees relating to the issue and redemption of units, and the cost of financial and other reports, costs and expenses for the Fund's Independent Review Committee ("IRC"), including fees and expenses of the IRC members and compliance with applicable laws, regulations and policies. The Manager pays for such expenses on behalf of the Fund, except for certain expenses such as interest, and is then reimbursed by the Fund.

Other expenses

The Manager will be reimbursed by the Fund for all reasonable costs, expenses and liabilities incurred by the Manager for performance of services on behalf of the Fund in connection with the discharge by the Manager of its duties hereunder. Such costs and expenses may include, without limitation: mailing and printing expenses for reports to unitholders and other unitholder communications; a reasonable allocation of salaries and benefits; and other administrative expenses and costs incurred in connection with the Fund's continuous public offering and other obligations. These expenses are allocated by the Manager on a reasonable basis, across all the Harvest Portfolios Group Inc. funds, and classes of each applicable fund. These expenses were \$103,476 for the Period and are included in the unitholder reporting costs on the Statement of Comprehensive Income (Loss) in the financial statements.

Waivers and absorptions

At its sole discretion, the Manager may waive management fees or absorb expenses of the Fund. There were no management fee waivers for the Period. The Manager absorbed \$92,238 of expenses of the Fund for the Period. The Manager may cease doing so at any time without notice to unitholders.

The management expense ratios of the Fund with and without the waivers and absorptions are reported in the Ratios and Supplemental Data table below.

Other transactions

Officers, directors and related entities of the Manager invest in units of the Fund from time to time in the normal course of business and on the same basis as arm's length investors. As at December 31, 2025 officers and directors owned 5,162 units of the Fund.

Other funds that are also managed by the Manager owned the following percentage of the NAV of the Fund:

	% net assets
December 31, 2025	25.8

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period.

Harvest Tech Achievers Growth & Income ETF

FINANCIAL HIGHLIGHTS

The following tables present selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and past annual periods. This information is derived from the Fund's annual audited financial statements.

Class A

THE FUND'S NET ASSETS PER UNIT	2025	2024	2023	2022	2021

Explanatory Notes:

- Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
- Distributions, if any, are paid in cash. The Fund may pay additional year end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans. Included in the above amounts is the reinvested distribution of \$0.74 per unit paid to Class A unitholders of record on December 31, 2021.
- Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
- The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Tech Achievers Growth & Income ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following charts present the Fund's performance for each of the years shown and illustrate how the Fund's performance varied for Class A, Class B, and Class U. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Class A

Class B

Class U (USD)

Annual Compound Returns

The following table shows the annual compound returns for the Fund. All returns are in Canadian dollars, unless otherwise specified, on a total return basis, net of fees.

For comparison purposes, the Solactive US Large & Mid Cap Technology Index NTR (USD)[†] is used. While the Fund uses this benchmark for long-term performance comparisons, it is not managed relative to the composition of this benchmark. As a result, the Fund may experience periods when its performance is not aligned with this benchmark, either positively or negatively. The return of this benchmark is calculated without the deduction of management fees and fund expenses whereas the performance of the Fund is calculated after deducting such fees and expenses. Please see the "Results of Operations" section of this report for a discussion on recent performance.

Investment Return %	1 Year	3 Years	5 Years	10 Years	Since Inception [‡]
Fund Performance Class A	12.38	28.51	15.50	17.33	15.50

Disclaimers

CAUTION REGARDING FORWARD-LOOKING STATEMENTS

This document may contain forward-looking statements relating to anticipated future events, results, circumstances, performance or expectations that are not historical facts but instead represent our beliefs regarding future events. By their nature, forward-looking statements require us to make assumptions and are subject to inherent risks and uncertainties. There is significant risk that predictions and other forward-looking statements will not prove to be accurate. We caution readers of this document not to place undue reliance on our forward-looking statements as a number of factors could cause actual future results, conditions, actions or events to differ materially from the targets, expectations, estimates or intentions expressed or implied in the forward-looking statements. Actual results may differ materially from management expectations as projected in such forward-looking statements for a variety of reasons, including but not limited to market and general economic conditions, interest rates, regulatory and statutory developments, the effects of competition in the geographic and business areas in which the Fund may invest and the risks detailed from time to time in the Fund's prospectus or offering memorandum. We caution that the foregoing list of factors is not exhaustive and that when relying on forward-looking statements to make decisions with respect to investing in a Fund, investors and others should carefully consider these factors, as well as other uncertainties and potential events, and the inherent uncertainty of forward-looking statements. Due to the potential impact of these factors, the Fund does not undertake, and specifically disclaims, any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, unless required by applicable law.

^y The Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark or the Index Price at any time or in any other respect. The Index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the Manager, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trade mark for the purpose of use in connection with the Fund constitutes a recommendation by Solactive AG to invest capital in said Fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this financial instrument.
