

Harvest Diversified High Income Shares ETF

Interim Management Report of Fund Performance

June 30, 2026

Harvest Diversified High Income Shares ETF

CORPORATE OVERVIEW

Harvest Portfolios Group Inc. ("Harvest" or the "Manager") manages the Harvest ETFs and is a Canadian Investment Manager founded in 2009. Harvest is focused on developing investment products that follow three investment criteria.

We (i) endeavor to develop investment products that are clear in their mandate and easy for investors to understand, (ii) strive to be transparent so that our investors can review their financial reports and know exactly what they own, and (iii) seek to provide investors with consistent monthly income by investing in well-managed companies that have a steady cash flow and dividend-paying history.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

The interim management report of fund performance contains financial highlights but does not contain the complete interim financial statements of the Harvest Diversified High Income Shares ETF (the "Fund"). You can obtain a copy of the interim financial statements upon request, and at no cost, by calling toll-free at 1-866-998-8298; by writing to us at Harvest Portfolios Group Inc., 610 Chartwell Rd, Suite 204, Oakville, Ontario, L6J 4A5; or by visiting our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Unitholders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVES AND STRATEGY

The Fund's investment objective is to provide unitholders with high monthly cash distributions and the opportunity for capital appreciation on a levered basis by investing in a portfolio of exchange traded mutual funds managed by the Manager ("Underlying ETFs") that (i) invest in single equity securities, and (ii) engage in covered call strategies.

To achieve its investment objectives, the Fund will invest primarily in a portfolio of exchange traded mutual funds managed by the Manager that (i) are listed on a Canadian stock exchange, (ii) invest in single equity securities, and (iii) engage in covered call strategies.

The Fund is considered an alternative mutual fund within the meaning of NI 81-102 and is permitted to invest in asset classes or use investment strategies that are not permitted for other types of mutual funds. As an alternative mutual fund, the Fund may use strategies generally prohibited for conventional mutual funds, including investing in other alternative mutual funds; using leverage through the use of cash borrowings, short sales and/or derivatives; and having an increased ability to invest in commodities. While these strategies will be used in accordance with the Fund's investment objectives and strategies, they may, under certain market conditions, accelerate the rate at which an investment decreases in value.

RISK

The risks associated with investing in the Fund are as described in the prospectus. There were no material changes to the Fund over the six-month period ended June 30, 2026 (the "Period") that affected the overall level of risk of the Fund.

RESULTS OF OPERATIONS

Overall Performance

The Fund's return compared to the Solactive US Large & Mid Cap Technology Index NTR^y for the Period is as follows:

	Return %
Class A (CAD)	5.31
Solactive US Large & Mid Cap Technology Index NTR (USD) ^y	12.16
Solactive US Large & Mid Cap Technology Index NTR (CAD) ^y	16.02

The primary reason for the divergence is that the index is market-capitalization weighted and does not account for the use of covered calls compared to the Fund that is generally equally weighted. The Fund's underlying ETF holdings typically employ modest leverage of approximately 25% that can compound performance positively or negatively depending on market movements and employ covered call strategies.

Factors Affecting Fund Results

The Fund invests in a portfolio of 20 Harvest High Income Shares ETF products. These ETFs utilize modest leverage of approximately 25% and employ covered call strategies in order to generate monthly cash flow through the sale of call options.

Fund performance was volatile during the Period but ultimately ended in positive territory. Positions correlated to movements in digital assets, such as the Harvest Strategy Inc. Enhanced High Income Shares ETF and the Harvest Circle Enhanced High Income Shares ETF, experienced broad declines, reflecting weakness in digital currencies generally. This weakness was more than offset by strong gains across positions exposed to investments in artificial intelligence infrastructure spending, such as the Harvest AMD Enhanced High Income Shares ETF and the Harvest Broadcom Enhanced High Income Shares ETF.

RECENT DEVELOPMENTS

Potential Impact for the Fund

Signs of an acceleration in U.S. economic activity are expected to support improving market breadth in equity markets over the intermediate term, however elevated geopolitical risks, shifting trade policies and persistent inflationary pressures are likely to result in continued volatility. Expectations for further investment in infrastructure to support the development of artificial intelligence are anticipated to provide a tailwind for many of the Fund's investments over the intermediate term, however reemerging concerns regarding the ultimate return on investment of these initiatives could be a source of volatility for the theme.

Harvest Diversified High Income Shares ETF

Mid-Year Market Review

The first half of 2026 was characterized by heightened macroeconomic volatility, driven by a temporary but severe geopolitical disruption in the energy sector and shifting equity market concentration. Global equity markets demonstrated notable resilience amidst rising inflation and unemployment pressures in the first quarter. This transitioned into a broader market expansion during the second quarter as commodity pressures eased, and market leadership diversified.

These macroeconomic and geopolitical conditions were reflected across major indices, with the small-cap Russell 2000 leading equity performance with significant gains, making it a record first-half performance. The Nasdaq Composite advanced on the back of semiconductor hardware manufacturing, which offset weakness in mega-cap software names. Broad-market participation was further emphasized by equal-weighted indexes outperforming their market-cap-weighted counterparts, which faced headwinds from corrections among their largest technology constituents.

The Canadian equity market posted positive returns, supported heavily by an acceleration in financial stocks during the second quarter. In commodity markets, following the outbreak of the conflict in the Middle East, crude oil ultimately ended the first half of the year higher despite a sharp retreat in June. After making new highs to start the year, gold ultimately trended lower through most of the first half as investors contemplated the potential for interest rate hikes by central banks in response to new inflationary pressures related to higher energy prices.

The primary catalyst for early-half volatility stemmed from escalating tensions in the Middle East, which led to open conflict between the U.S. and Iran. The impacts of the war resulted in a sudden supply-side shock to global energy markets. Crude oil prices spiked into triple digits, amplifying global inflation expectations and compressing equity market multiples. Following a ceasefire agreement, supply concerns systematically receded. By June, the stabilization of critical shipping corridors led to a substantial decline in crude from its quarterly peak, mitigating inflationary pressures for the broader economy but acting as a direct headwind for energy sector equities late in the Period.

Simultaneously, a distinct structural divergence emerged within the technology and digital infrastructure sectors regarding artificial intelligence expenditures. Early in the year, investor concern intensified over the intermediate return on investment for large-scale enterprise AI infrastructure, leading to capital outflows and notable stock corrections for prominent hyperscalers. Conversely, demand for physical infrastructure and semiconductor components accelerated. Aggregate capital expenditure forecasts for primary hyperscalers were upwardly revised significantly for the full year. This aggressive capital deployment drove substantial outperformance in hardware suppliers, highlighted by historic gains for the semiconductor sector in the second quarter, which provided the primary tailwind for market-cap-weighted equity benchmarks.

The end of the half marked a broader transition in equity market leadership away from high concentration in mega-cap technology names. While cap-weighted benchmarks underwent modest consolidations, underlying market breadth expanded significantly. Capital rotated into cyclical, value, and economically sensitive sectors, led by Industrials alongside notable defensive advances in Financials and Health Care. Retail and institutional flows increasingly favored equal-weighted strategies and small-cap benchmarks, which more accurately captured the stabilizing trends of the broader underlying economy.

Fixed income markets faced consistent pressure through the first half of the year as long-term treasury yields repeatedly tested elevated thresholds due to persistent headline inflation. The monetary policy framework underwent a fundamental transition under the leadership of Federal Reserve Chair Kevin Warsh. While the committee maintained its benchmark interest rate, it discontinued the practice of providing formal forward guidance.

RECOMMENDATIONS OR REPORTS BY THE INDEPENDENT REVIEW COMMITTEE

The IRC tabled no special reports and made no extraordinary material recommendations to management of the Fund during the Period. A summary of related party transactions can be found in the Annual IRC Report to Securityholders, available on our website at www.harvestetfs.com; or on SEDAR+ at www.sedarplus.ca.

Management expense ratio before waivers or absorptions ⁴	1.72%	2.12%
Trading expense ratio ⁵	0.18%	0.15%
Portfolio turnover rate ⁶	21.59%	36.89%
Net asset value per unit (CAD)	\$ 15.28	\$ 16.71
Net asset value per unit (USD)	\$ 10.76	\$ 12.18
Closing market price - USD (HHIS.U)	\$ 10.77	\$ 12.18

Explanatory Notes:

1. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the reporting period. It is not intended that the Fund's net assets per unit table act as a continuity of opening and closing net assets per unit.
2. Net assets for Class A at the commencement of operations on January 14, 2025 was \$12.00. Class U commenced operations on October 3, 2025 with a net asset value per unit of \$13.00 USD.

Harvest Diversified High Income Shares ETF

3. Distributions, if any, are paid in cash or reinvested in additional units of the Fund. The Fund may pay additional year-end distributions in the form of reinvested units that are subsequently consolidated. There is no impact on NAV per unit, however such reinvested distributions increase the cost base of units held outside of registered plans.
4. Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) and the proportionate share of the Underlying ETFs' related expenses of the stated period and is expressed as an annualized percentage of the daily average net asset value during the period.
5. The trading expense ratio represents total commissions and other portfolio transaction costs and the proportionate share of the Underlying ETFs' related expenses expressed as an annualized percentage of daily average net asset value during the period.
6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate, the greater the trading costs payable by the Fund and the greater the chance of an investor receiving taxable capital gains. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.

Harvest Diversified High Income Shares ETF

PAST PERFORMANCE

The performance information presented herein assumes all dividends of the Fund during the periods presented were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, or other charges that would have reduced returns or affected performance. Past performance of the Fund is not necessarily indicative of how it will perform in the future.

Year-by-Year Returns

The following chart presents the Fund's performance for each of the years shown. The chart shows, in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year except for 2026 which represents the Period.

Class A

Harvest Diversified High Income Shares ETF

SUMMARY OF INVESTMENT PORTFOLIO

The major portfolio categories and top holdings of the Fund at the end of the Period are indicated in the following tables. A detailed breakdown of the Fund's holdings is available in the "Schedule of Investments" section of the Fund's interim financial statements.

As at June 30, 2026

Top Holdings	% of Net Asset Value
Harvest AMD Enhanced High Income Shares ETF, Class A Units	8.0
Harvest Eli Lilly Enhanced High Income Shares ETF, Class A Units	7.6
Harvest Apple Enhanced High Income Shares ETF, Class A Units	7.1
Harvest Alphabet Enhanced High Income Shares ETF, Class A Units	6.9
Harvest Broadcom Enhanced High Income Shares ETF, Class A Units	6.7
Harvest NVIDIA Enhanced High Income Shares ETF, Class A Units	6.7
Harvest Amazon Enhanced High Income Shares ETF, Class A Units	6.6
Harvest Tesla Enhanced High Income Shares ETF, Class A Units	6.3
Harvest Microsoft Enhanced High Income Shares ETF, Class A Units	5.8
Harvest Costco Enhanced High Income Shares ETF, Class A Units	5.2
Harvest Meta Enhanced High Income Shares ETF, Class A Units	4.8
Harvest CrowdStrike Enhanced High Income Shares ETF, Class A Units	4.7
Harvest Palantir Enhanced High Income Shares ETF, Class A Units	4.0
Harvest Robinhood Enhanced High Income Shares ETF, Class A Units	4.0
Harvest SpaceX Enhanced High Income Shares ETF, Class A Units	3.5
Harvest SoFi Enhanced High Income Shares ETF, Class A Units	3.4
Harvest Reddit Enhanced High Income Shares ETF, Class A Units	3.4
Harvest Coinbase Enhanced High Income Shares ETF, Class A Units	2.2
Harvest Circle Enhanced High Income Shares ETF, Class A Units	1.6
Harvest Strategy Inc. Enhanced High Income Shares ETF, Class A Units	1.4
Cash and other assets and liabilities	0.1
Total	100.0

SECTOR ALLOCATION

Sector	% of Net Asset Value
Information Technology	51.2
Communication Services	18.6
Consumer Discretionary	12.9
Health Care	7.6
Financials	7.4
Consumer Staples	2.2
Cash and other assets and liabilities	0.1
Total	100.0
