ASML with Enhanced Monthly Income

The Harvest ASML Enhanced High Income Shares ETF (TSX: **ASME**) provides access to the growth potential of ASML Holding NV and overlays an active covered call writing strategy on up to 50% of the position to provide enhanced monthly cash distributions to its unitholders. It applies modest leverage at around 25% for enhanced income and growth potential. Units of the ETF are available in CAD.

Ticker	ETF Name	Max. Write Level	Modest Leverage	Distribution Frequency	Distribution (per unit)
ASME	Harvest ASML Enhanced High Income Shares ETF	50%	25%	Monthly	TBA

*Subject to receipt of the final prospectus and final TSX listing approval.

Disclaimer: A preliminary prospectus containing important information relating to the securities of ASME has been filed with the securities commissions or similar authorities in all provinces and territories of Canada. The preliminary prospectus is still subject to completion or amendment. A copy of the preliminary prospectus is available on SEDAR+ (www.sedarplus.ca). There will not be any sale or acceptance of an offer to buy the securities until a receipt for the final prospectus has been issued. Commissions, management fees, and expenses all may be associated with ETFs. ETFs are not guaranteed, their values change frequently, and past performance may not be repeated.

The Funds that use modest leverage of 25% do so to enhance exposure, directly or indirectly, to the underlying stocks. This places them within the category of liquid alternative ETFs. The use of leverage increases the return volatility, meaning it will amplify both gains and losses.

Harvest Covered Call Strategy

Harvest ETFs uses an active covered call strategy to generate enhanced monthly income.

A trade-off of using a covered call strategy on securities in a portfolio is that it limits the potential upside for stocks in the portfolio on which call options were written.
