1 The current yield represents an annualized amount that is comprised of 12 unchanged monthly distributions (using the most recent month's distribution figure multiplied by 12) as a percentage of the closing market price of the Fund. The current yield does not represent historical returns of the ETF but represents the distribution an investor would receive if the most recent distribution stayed the same going forward.

2 Source: Bloomberg. Average statistics calculated based on portfolio weighted average. Dividend yield (gross) based on Bloomberg indicated 12 month yield of portfolios positions and does not represent the distribution yield paid to investors. P/E calculated based on Bloomberg consensus 12 month forward earnings estimates. The above information is for illustrative purposes only, is estimated and unaudited. Distributions are paid to you in cash unless you request, pursuant to your participation in a distribution reinvestment plan, that they be reinvested into Class A units of the Fund. If the Fund earns less than the amounts distributed, the difference is a return of capital.
